Environmental and Safety Consideration

Laser Safety Statement

The printer is certified in the U.S. to conform to the requirements of DHHS 21 CFR, chapter 1 Subchapter J for Class I(1) laser products, and elsewhere, is certified as a Class I laser product conforming to the requirements of IEC 825.

Class I laser products are not considered to be hazardous. The laser system and printer are designed so there is never any human access to laser radiation above a Class I level during normal operation, user maintenance, or prescribed service condition.

WARNING

Never operate or service the printer with the protective cover removed from Laser/Scanner assembly. The reflected beam, although invisible, can damage your eyes.

CAUTION - INVISIBLE LASER RADIATION WHEN THIS COVER OPEN. DO NOT OPEN THIS COVER.

VORSICHT - UNSICHTBARE LASERSTRAHLUNG, WENN ABDECKUNG GEÖFFNET. NICHT DEM STRAHL AUSSETZEN.

ATTENTION - RAYONNEMENT LASER INVISIBLE EN CAS D'OUVERTURE. EXPOSITION DAN GEREUSE AU FAISCEAU.

ATTENZIONE - RADIAZIONE LASER INVISIBILE IN CASO DI APERTURA. EVITARE L'ESPOSIZIONE AL FASCIO.

PRECAUCION - RADIACION LASER IVISIBLE CUANDO SE ABRE. EVITAR EXPONERSE AL RAYO.

ADVARSEL. - USYNLIG LASERSTRÅLNING VED ÅBNING NÅR SIKKERHEDSBRYDERE ER UDE AF FUNKTION. UNDGÅ UDSAETTEELSE FOR STRÅLNING.

ADVARSEL. - USYNLIG LASERSTRÅLNING NÅR DEKSEL ÅPNES. STIRR IKKE INN I STRÅLEN. UNNGÅ EKSPONERING FOR STRÅLEN.

VARNING - OSYNLIG LASERSTRÅLNING NÅR DENNA DEL ÄR ÖPPAND OCH SPÄRREN ÄR URKOPPLAD. BETRAKTA EJ STRÅLEN. STRÅLEN ÄR FARLIG.

VARO! - AVATTAESSA JA SUOJALUKITUS OHITETTAESSA OLET ALTTIINA NÄKYMÄTTÖMÄLLE LASERSÄTEILYLLE ÄLÄ KATSO SÄTEESEEN.

Ozone Safety

During normal operation, the ML-6040 printer produces ozone. The ozone produced does not present a hazard to the operator. However, it is advisable that the machine be operated in a well ventilated area.

If you need additional information about ozone, please contact your nearest Samsung dealer.

Power Saver

This printer contains advanced energy conservation technology that reduces power consumption when it is not in active use.

When the printer does not receive data for an extended period of time, power consumption is automatically lowered.

The energy star emblem does not represent EPA endorsement of any product or service.

Radio Frequency Emissions

FCC Declaration of Conformity

1. Product Name : Laser Printer
2. Model Number : Samsung ML-6040
3. FCC Rules : TESTED TO COMPLY WITH FCC PART 15 CLASS B
4. Operating Environment : FOR HOME OR OFFICE USE
5. FCC Compliance Statement

This device complies with Part 15 FCC rules. Operating is subject to the following two conditions : (1)This device may not cause harmful interference, and

(2)This device must accept any interference received, including interference that can any cause undesired operation.

6. Information to User

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- (1) Reorient or relocate the receiving antenna.
- (2) Increase the separation between the equipment and receiver.
- (3) Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- (4) Consult the dealer or an experienced radio/TV technician for help.

CAUTION: Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

Party Responsible for Product Compliance

Samsung Electronics America
American QA Lab
85 West Tasman Dr.
San Jose, CA 95134

Canadian Radio Interference Regulations

This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus as set out in the interference-causing equipment standard entitled "Digital Apparatus", ICES-003 of the Industry and Science Canada.

Cet appareil numérique respecte les limites de bruits radioélectriques applicables aux appareils numériques de Classe B prescrites dans la norme sur le matériel brouilleur: "Appareils Numériques", ICES-003 édictée par l'Industrie et Sciences Canada.

EC Declaration of Conformity

We,

SAMSUNG ELECTRONICS CO., LTD.
#259, Gong Dan-Dong, Gumi-City, Kyung Buk, Korea

declares sole responsibility that the

Samsung ML-6040 Laser printer

meets the intent of Directive 89/336/EEC for Electromagnetic Compatibility and Low Voltage Directive 73/23/EEC.

Compliance was demonstrated to the following specifications as listed in the official journal of the European Communities:

EN 50081-Emissions:

- EN 55022 Radiated, Class B
- EN 55022 Conducted, Class B
- EN 61000-3-2 Power Harmonics
- EN 61000-3-3 Voltage Fluctuations and Flicker

EN 55024-EMS:

- EN 6100-4-2 Electrostatic Discharge
- EN 6100-4-3 RF Electromagnetic Field
- EN 6100-4-4 Fast transients
- EN 6100-4-5 Surges
- EN 6100-4-6 RF Common mode
- EN 6100-4-11 Voltage Dips and Interruptions

EN 60950-Safety

chapter

1

Introduction

Congratulations on the purchase of your ML-6040 printer!
This chapter provides information on the following topics:

- ◆ Special Features
- ◆ Printer Components

Special Features

1

Your new Samsung ML-6040 printer is equipped with special features that improve print quality, giving you a competitive edge. You can:

Print with excellent quality and high speed

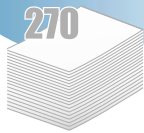

600 DPI

- You can Print at **600 dots per inch** (dpi). See page 5.18.
- Your printer can print **12 pages-per-minute**.

Flexible paper handling

270

- Standard **270-sheet input tray** (Auto Tray) supports all standard sizes of paper.
- A 1-sheet **Manual Tray** supports envelopes, labels, transparencies, custom-sized media, postcards, and heavy paper.
- Your printer has two output trays: Select either **the top face-down output** or **the rear face-up output tray** for the most convenient access.
- You can use a **straight-through paper path** from the Manual Tray to the rear output tray.

Create professional documents

- Customize your documents by using **Watermarks** such as "Confidential." See page 5.21.
- You can print **Booklets**. This feature enables you to easily print the pages required to create books. Once printed, all you have to do is fold and staple the pages. See page 5.13.
- You can print **Posters**. The text and pictures of each page of your document are magnified and printed across the selected sheet of paper. After the document has printed, trim off the white edges of each sheet. Tape the sheets together to form a poster. See page 5.16.

Save time and money

- You can use the **Toner Save** mode to save toner supply. See page 5.6.
- Your printer allows you to print on both sides of the paper to save paper (**Manual Duplexing**). See page 5.7.
- Your printer allows you to print multiple pages on a single sheet of paper to save paper (**N-Up printing**). See page 5.10.
- Preprinted forms and letterheads can be printed on plain paper (**Page Overlay**). See page 5.24.
- One-touch **last page printing** is available when the printer is in ready mode. See page 5.30.
- The Samsung ML-6040 printer meets **Energy Star** guidelines for energy efficiency.

Print in various environments

- You can print in **Windows 95/98/Me/2000/NT 4.0**.
- Your printer supports **Linux** and **Macintosh**.
- ML-6040 printer comes with **Parallel** and **USB** interface.

Printer Components

chapter

2

Setting Up Your Printer

This chapter provides step by step information on setting up your printer. Topics included in this chapter are:

- ◆ **STEP 1:** Unpack Your Printer
- ◆ **STEP 2:** Install the Toner Cartridge
- ◆ **STEP 3:** Load Paper
- ◆ **STEP 4:** Connect to the Computer with a Parallel Cable
- ◆ **STEP 5:** Turn on the Printer
- ◆ **STEP 6:** Print a Demo Page!
- ◆ **STEP 7:** Install the Printer Software
- ◆ Installing Software from Diskette

Unpack Your Printer

- 1 Remove the printer and all accessories from the packing carton. Make sure that your printer has been packed with the following items:

Notes:

- If any items are missing or damaged, notify your dealer immediately.
- **Components may differ from one country to another.**

Toner cartridge

Setup Guide

CD-ROM*

Power cord

IEEE 1284-compliant printer cable

* contains printer software, User's Guide, Adobe Acrobat Reader and Make Installation Diskette setup software.

- 2 Carefully remove all packing tapes from the printer.

Install the Toner Cartridge

- 1 Open the top cover lid. Pull up on the handle to open the lid.

- 2 Carefully tear one end of the plastic bag.

Don't use a knife or other sharp objects as they might scratch the drum of the cartridge.

- 3 Locate the sealing tape at the end of the toner cartridge. Carefully pull the tape completely out of the cartridge. Discard the tape.

- 4 Gently shake the cartridge from side to side to distribute the toner evenly inside the cartridge.

CAUTION:

To prevent damage, do not expose the toner cartridge to light for more than a few minutes. Cover it with a piece of paper if left exposed for more than a few minutes.

If toner gets on your clothing, wipe it off with a dry cloth and wash clothing in cold water. **Hot water sets toner into fabric.**

- 5** Locate the cartridge slots inside the printer, one on each side.

- 6** Grasp the handle and insert the cartridge in the printer until it snaps in place.

- 7** Close the top cover. Make sure that the cover is securely closed.

Note: When printing text at 5% coverage, you can expect a toner cartridge life of approximately 6,000 pages (3,000 pages for the toner cartridge that is shipped with the printer).

Load Paper

- 1 Pull the paper tray out of the printer.

- 2 Push down on the metal paper lift plate to lock it in place.

- 3 Load paper with the print side facing down.

Make sure that all four corners are flat in the tray.

- 4** Make sure that the stack goes under the metal retaining clip (A) and the plastic tabs on the end guides. Pay attention to the paper limit mark on the left inside wall of the tray. Paper overloading may cause paper jams.

Note: If you want to change the paper size in tray, refer to “To Change Paper Size in Tray” below.

- 5** Slide the tray back into the printer.

To Change Paper Size in Tray

- 1** Adjust the tray for different paper sizes by sliding the appropriate paper length guide to the desired position.

Load Paper

- For legal, folio, or paper, use the the back guide.

- For letter, executive, A4, JIs B5, A5, or A6 size paper, use the the front and back guide.

- 2** After loading paper, squeeze the width guide as shown and slide it to the left until it lightly touches the paper stack.

Notes:

- Do not push the width guide far enough to cause the media to warp.
- If you do not adjust the width guide, it may cause a paper jam.

STEP 4

Connect to the Computer with a Parallel Cable

- 1 Make sure that both the printer and the computer are turned off.
- 2 Plug the parallel printer cable into the connector on the back of the printer.

Push the metal clips down to fit inside the notches on the cable plug.
- 3 Connect the other end of the cable to the parallel interface port on your computer, and tighten the screws.

See your computer documentation if you need help.

If you are using a USB interface

Go to "Using Your Printer with a USB Cable" on page A.10.

STEP 5

Turn on the Printer

- 1 Plug the power cord into the power receptacle on the back of the printer.
- 2 Plug the other end into a properly grounded AC outlet.
- 3 Turn on the power.

Print a Demo Page!

As the printer powers up, all the printer control panel lights turn on briefly. When only the **Data** light remains on, press and hold the **Demo** button.

Hold the **Demo** button down until all the lights blink (for about 2 seconds) and then release. The demo page will print.

The demo page provides a sample of the print quality to help you verify that the printer is printing correctly.

You can print the configuration sheet which lists many of the current settings and properties of the printer by pressing and holding **Demo** for about 6 seconds while the printer is in the ready mode.

Included with your printer is a CD-ROM containing the printer drivers for some of the most popular Windows software applications. To operate your printer, you must install a printer driver, which translates data from your application into data that the printer understands.

The CD-ROM shipped with your printer contains the following:

- **GDI printer driver** for Windows. Use this driver to take full advantage of your printer's features.
- **USB driver** for the USB interface to allow you to print with a USB cable.
- **Printer driver** for Macintosh to allow you to use your printer with a Macintosh.
- **Linux driver** for Linux to allow you to use your printer in Linux.

If you are printing from a computer with a parallel cable

Go to page 2.10 for information on installing the printing software on a computer that is attached directly to the printer with a parallel cable.

If you are printing with a USB cable

Go to "Using Your Printer with a USB Cable" on page A.10, for information on installing the print software on a USB-enabled computer.

If you are printing from a Macintosh

Go to "Using Your Printer with Macintosh" on page A.16, for information on installing the printer driver for Macintosh.

If you are printing from the Linux system

Go to "Linux Driver Installation" on page A.23, for information on installing the Linux driver for printing in the Linux system.

Before Installing the Printer Software

Verify the following:

- At least **16 MB or more of RAM** is installed on your PC.
- There is at least **30 MB of free disk space** on your PC.
- All applications are closed on your PC before beginning installation.
- Windows 9x, Windows Me, Windows 2000 or Windows NT 4.0.

Installing the Printer Software from the CD-ROM

- 1 Place the CD-ROM in the CD-ROM drive. Installation will start automatically.

If the CD-ROM drive does not automatically run:

Select **Run** from the **Start** menu, and type **x:\cdsetup.exe** in the Open box (where **x** is the drive letter for the CD-ROM drive), then click **OK**.

Note: If the New Hardware Found box appears during the installation procedure, click the **[X]** in the upper right corner of the box, or click **Cancel**.

- 2 When the opening screen appears, select the appropriate language.

- 3 Click Install the Samsung Software on your PC.

- 4 The Welcome window opens. Click Next.

- 5 The files are copied into the appropriate directory.
- 6 Click **Finish**.

Software Installation Tips

I do not have a CD-ROM drive

If you have access to another computer with a CD-ROM drive, you can use the make diskette utility in Windows to create the disks you need for the installation. Go to "Installing Software from Diskette" on page 2.15.

How do I remove the printing software ?

In Windows, after installation, the Uninstall icon in the ML-6040 series program group allows you to select and remove any or all of the Windows ML-6040 printing system components.

To uninstall the printer software:

- 1 From the **Start** menu, select **Programs**.

- 2 Select **Samsung ML-6040 Series**, and then **Samsung ML-6040 Series Driver Uninstall**.

- 3 When your computer confirms your selection, click **Yes**.
- 4 The Samsung ML-6040 Series printer driver and all of its components are removed from your computer.

- 5 Click **OK**.

How do I access printer features ?

Some printer features, such as paper size and page orientation, may be available through your application settings. Use application settings, if available, because they override printer driver settings.

Access advanced printer features through your printer driver. See Chapter 5, "Printing Tasks" for instructions on using your printer driver features.

If you have problems installing

- Exit your software programs. Then turn off the computer and the printer. Turn on the printer and the computer.
- Close any virus protection programs that are running on your computer.
- Uninstall the printer software following the instructions on page 2.12, then repeat the installation procedure.

Installing Software from Diskettes

If you do not have a CD-ROM drive but you have access to another computer with a CD-ROM drive, you can copy software installation files from your printer software CD-ROM onto floppy diskettes, and then use the diskettes instead of the CD-ROM to install the software.

2

Making Installation Diskettes

You can make installation diskettes for the ML-6040 printer driver. Make sure that you have several formatted diskettes ready, and then follow these steps:

- 1 Insert the CD-ROM shipped with your printer into the CD-ROM drive. Installation will start automatically.

If the CD-ROM drive does not automatically run:

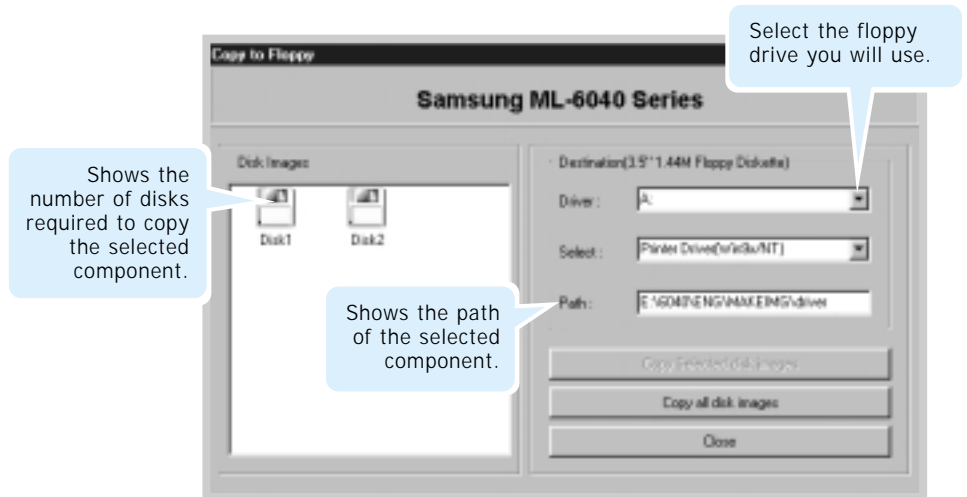

Select **Run** from the **Start** menu, and type **x:\cdsetup.exe** in the Open box (where **x** is the drive letter for the CD-ROM drive), then click **OK**.

- 2 When the opening screen appears, select the appropriate language.
- 3 Click **Make your own Diskette set of software**.

4 The Copy to Floppy dialog box appears.

Select the floppy disk drive you will use to insert the diskette.

5 Click **Copy all disk images**.

If you want to copy a portion of the selected component, select the disk you want to copy in the Disk Images window, then click **Copy selected disk image**.

6 When prompted, insert a blank, formatted diskette into the floppy drive, and click **Yes** to copy the first diskette. For multiple diskettes, when the first diskette is finished, you are prompted to insert disk 2.

Make sure you label each diskette in order of creation: ML-6040 printer driver, disk 1 of 2, etc.

- 7 If you have more than one disk, insert the next disk and click **Yes**. Repeat this step for a third disk if necessary.
- 8 When copying to diskettes has been completed, click **Close** in the Copy to Floppy dialog box. Then click **Exit** in the SAMSUNG PRINTER SETUP dialog box.

Installing Software

To install the print software from the diskette, take the following steps:

- 1 Insert the first diskette (if you have more than one selected software diskette).
- 2 From the **Start** menu, select **Run**.

- 3 Type **A:\setup.exe** in the Open box and click **OK**. (if your floppy drive is not **A**, substitute the correct letter.)
- 4 Follow the on-screen instruction to complete the installation.

chapter

3

Using Control Panel

This chapter describes how to use the printer's control panel. It provides information on the following topics:

- ◆ Control Panel Buttons
- ◆ Control Panel Lights

Control Panel Buttons

The printer has three buttons: **Cancel/Reprint**, **Demo** and **Toner Save**.

3

Cancel/Reprint

Cancel job

Press **Cancel/Reprint** and hold until the control panel lights blink to cancel a job the printer is currently printing. The **Error** light will blink while the print job is cleared from both the printer and the computer, and the printer will then return to the ready mode. This may take some time, depending on the size of the print job.

Note: If the **Cancel/Reprint** button is accidentally pushed, the job must be reprinted. There is no undo function.

Reprint last page of the job

If you press **Cancel/Reprint** in the ready mode, the printer prints the last page of the last print job. For further information, see page 5.30.

Demo

Print demo page and configuration sheet

Press and hold **Demo** for about 2 seconds until the control panel lights blink slowly to print a demo page. The printer must be in the ready mode.

Press and hold **Demo** for about 6 seconds until the control panel lights blink rapidly to print a configuration sheet. The printer must be in the ready mode. For further information, see page 2.8.

Start manual feeding

When you select **Manual** for **Paper Source** from your software application, you should press **Demo** each time you feed a sheet of paper manually. For further information, see page 4.7.

Cleaning the inside of the printer

Press and hold **Demo** for about 10 seconds until the control panel lights remain illuminated to automatically clean the inside of the printer. After cleaning the printer, one cleaning sheet prints. For further information, see page 6.5.

Toner Save

(on)

Toner Save

(off)

Toner Save

Press **Toner Save** to turn the toner save mode on or off. The printer must be in the ready mode.

- If the button backlight is on, toner save mode activates and the printer uses less toner to print a document.
- If the button backlight is off, toner save mode is disabled and you will print in normal quality.

For further information on the Toner Save mode, see page 5.6.

Control Panel Lights

The control panel lights indicate the status of your printer. If the **Error** light is on, the printer is experiencing an error. See “Troubleshooting Error Messages” on page 7.19.

Light status legend

 symbol for “light off”

 symbol for “light on”

 symbol for “light blinking”

Control Panel Light Message

Ready Mode

The **Data** light is on and the printer is ready to print.

No action is needed. If you press and hold the **Demo** button for about 2 seconds, a demo page will print. If you press and hold the button for about 6 seconds, a configuration sheet will print.

Processing

The printer is receiving or processing data. Wait for the job to print.

Pressing the **Cancel/Reprint** button cancels the current job. One or two pages may print as the printer clears the print job. The printer will return to the ready mode after the job has been canceled.

Data

The **Data** light blinks rapidly. Data is in the printer memory waiting to be printed.

Pressing the **Cancel/Reprint** button cancels the current job and the printer returns to the ready mode.

Paper out

The printer is out of paper. The **Paper** light blinks until paper is added.

Load paper into the printer. There is no need to press any button to reset.

Manual feed mode

The printer is set to **Manual** mode for the paper source. You have to feed paper manually through the Manual Tray. If you do not want to be in the Manual Feed mode, change the setting from your printer properties. For details on the Manual mode, see page 4.7.

Error

Manual

Paper

Data

Paper out in the manual feed mode

In the manual feed mode, the printer picks up paper from the Manual Tray, one sheet at a time.

Feed the correct paper in the Manual Tray, and press the **Demo** button to start printing.

Print Media

This chapter will help you understand what kind of paper you can use with the ML-6040 printer and how to properly load paper in the different paper trays for the best print quality.

Topics included in this chapter are:

- ◆ Choosing Paper and Other Media
- ◆ Selecting Output Tray
- ◆ Loading Paper
- ◆ Printing on Envelopes
- ◆ Printing on Heavy Paper
- ◆ Printing on Labels
- ◆ Printing on Transparencies
- ◆ Printing on Preprinted Paper
- ◆ Printing on Card Stock or Custom-sized Media

Choosing Paper and Other Media

You can print on a variety of print media, such as plain paper, envelopes, labels, transparencies, card stocks and so on. See “Paper Specifications” on page A.2. To get the best possible print quality, use only high-quality copier-grade paper.

When you choose print media, consider the following:

- **Desired outcome:** The paper you choose should be appropriate for the project.
- **Size:** You can use any size paper that fits easily within the paper adjusters of the paper tray.
- **Weight :** Your printer supports paper weight as follows:
 - 16~28 lbs bond for Auto Tray
 - 16~53 lbs bond for Manual Tray
- **Brightness:** Some papers are whiter than others and produce sharper, more vibrant images.
- **Surface smoothness:** The smoothness of the paper affects how crisp the printing looks on the paper.
- **Opacity:** Opacity refers to the degree to which printing on one side of the paper shows through the other side. Use paper high in opacity (or thicker paper) for two-sided (duplex) printing.

Always test a sample of paper before purchasing large quantities.

CAUTION: Using media that does not conform to the specification listed in the paper specification can cause problems that may require service. This service is not covered by the warranty or service agreements.

Media Sizes and Capacities

Media Size	Input Source/Capacity*	
	Auto Tray	Manual tray
Plain Paper		
Letter (8.5 x 11 in.)	270	1
Legal (8.5 x 14 in.)	270	1
Executive (7.25 x 10.5 in.)	270	1
Folio (8.5 x 13 in.)	270	1
A4 (210 x 297 mm)	270	1
JIS B5 (182 x 257 mm)	270	1
A5 (148 x 210 mm)	250	1
A6 (105 x 148 mm)	250	1
Envelopes		
No. 10 (4.12 x 9.5 in.)	–	1
Monarch (3.87 x 7.5 in.)	–	1
C5 (162 x 229 mm)	–	1
DL (110 x 220 mm)	–	1
B5 (176 x 250 mm)	–	1
Labels		
Letter (8.5 x 11 in.)	–	1
A4 (210 x 297 mm)	–	1
Transparency films		
Letter (8.5 x 11 in.)	–	1
A4 (210 x 297 mm)	–	1
Card stocks/Bond	–	1

* Depending on paper thickness, maximum capacity may be reduced.

Paper Guidelines

When selecting or loading paper, envelopes, or other special media, keep these guidelines in mind:

- Attempting to print on damp, curled, wrinkled, or torn paper can **cause paper jams** and poor print quality.
- **Use** cut-sheet paper **only**. You cannot use multi-part paper.
- **Use only** high-quality, copier grade paper.
- **Do not** use paper that has been already printed on or that has been fed through a photocopier.
- **Do not** use paper with irregularities, such as tabs or staples.
- **Do not** attempt to load any tray during printing and never overfill the tray. This could cause a paper jam.
- **Avoid** paper with embossed lettering, perforations, or texture that is too smooth or too rough.
- Colored paper should be of the same high quality as white photocopy paper. The pigments must withstand the printer's fusing temperature of 400°F (205°C) for 0.1 second without deterioration. **Do not** use paper with a colored coating that was added after the paper was produced.
- Preprinted forms must be printed with nonflammable, heat-resistant ink that will not melt, vaporize, or release hazardous emissions when subjected to the printer's approximately 400°F (205°C) fusing temperature for 0.1 second.
- Store paper in its ream wrapper until it is ready to use. Place cartons on pallets or shelves, not on the floor.
- **Do not** place heavy objects on top of the paper, whether it is packaged or unpackaged.
- **Keep** paper away from moisture, direct sunlight or other conditions that can cause it to wrinkle or curl.

Selecting the Output Tray

The printer has two output locations: the **rear output tray** and the **top output tray**. To use the top output tray, be sure the rear output tray is closed. To use the rear output tray, open it.

- If paper coming out of the top output tray has problems, such as excessive curl, **try printing to the rear output tray**.
- To avoid paper jams, **do not open or close the rear output tray** while the printer is printing.

Printing to the Top Output Tray (Face down)

▲ Top output tray

The top output tray collects paper **face-down, in correct order**. The top output tray should be used for most print jobs and is recommended for printing the following:

- over 250 sheets of paper, continuously
- transparencies

Printing to the Rear Output Tray (Face up)

▲ Rear output tray

The printer always prints to the rear output tray if it is open. Paper comes out of the printer **face-up, with the last page on top**.

Printing from the Manual Tray to the rear output tray provides the **straight paper path**. Opening the rear output tray might improve output quality with the following:

- over 100 sheets of paper, continuously
- envelopes
- labels
- small custom-size paper
- postcards
- paper lighter than 16 lb (60 g/m²) or heavier than 28 lb (105 g/m²)

To open the rear output tray:

- 1 Open the rear door by pulling it down. The cover functions as the output tray.

- 2 Pull the extender to extend the output tray to its full-length position. This will allow the tray to hold longer paper.

- 3 If you do not want to stack the printed pages on the rear output tray, slide the extender back into place and close the tray. The pages will then stack on the top output tray.

Loading Paper

Proper paper loading helps to prevent paper jams and ensure trouble-free printing. **Do not** remove paper tray while a job is printing. Doing so may cause a paper jam.

The paper level indicator on the front of the paper tray shows the amount of paper currently left in the tray. When the tray is empty, the indicator turns red.

Using Auto Tray

Auto tray

Auto Tray holds 270 sheets of paper. See "Media Sizes and Capacities" on page 4.2 for acceptable paper size and capacities of the tray.

Load a stack of paper into the Auto Tray and print. For details on loading paper in the Auto Tray, see "Load Paper" on page 2.4.

Using the Manual Tray

When you change the print settings, if you select **Manual** in the **Paper Source** option, you can manually load paper in the Manual Tray. Manually loading paper can be helpful when you want to check the print quality after each page is printed.

You must load paper sheet-by-sheet in the Manual Tray, send print data to print the first page, and press the **Demo** button to print each following page.

- 1 Pull the Manual Tray down towards you.

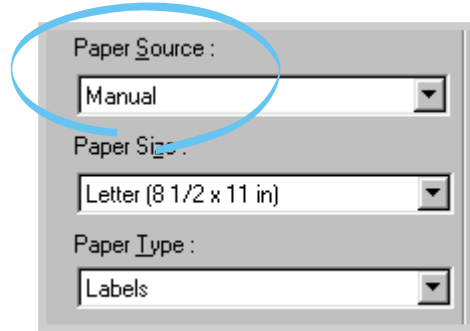

- 2 Load the paper in the Manual Tray **with the print side up**.

Adjust the guide to the width of paper.

- When you print a document, you must select **Manual** for **Paper Source** from the software application, and then select the correct paper size and type. For details, see page 5.3.

- Print the document.

- The **Manual** light on the control panel blinks. Press the **Demo** button on the control panel.

The sheet of paper is loaded and printed.

- After one page is printed, the **Manual** light on the control panel blinks again.

Feed the next sheet into the Manual Tray and press the **Demo** button.

Repeat this step for every page to be printed.

Printing on Envelopes

Guidelines

- Only use envelopes recommended for laser printers. Before you load envelopes in the Manual Tray, make sure that they are undamaged.
- Do not feed stamped envelopes.
- Never use envelopes with clasps, snaps, windows, coated lining, or self-stick adhesives. These envelopes may severely damage the printer.

- 1 Open the Manual Tray by pulling it down toward you.

- 2 Open the rear output tray and pull the extender.

- 3 Load the envelope **with the flap side down**.

The stamp area is **on the left side** and the end of the envelope **with the stamp area enters the Manual Tray first**.

- 4 Adjust the guide to the width of envelope.

- 6 When you print on envelopes, configure the paper source, type and size properly in the software application. For details, see page 5.3.

- 7 After printing, close the Manual Tray and the rear output tray.

Paper Source :	<input type="text" value="Manual"/>
Paper Size :	<input type="text" value="B5 Env. (176 x 250 mm)"/>
Paper Type :	<input type="text" value="Envelope"/>

Printing on Heavy Paper

Guidelines

- Heavy paper is any paper heavier than 24 lb (90 g/m²). The maximum paper weight available for your printer is 43 lb (163g/m²).
- Do not use extremely heavy paper stock (greater than 43 lb, or 163 g/m² bond). Misfeeds, mis-stacking, media jams, poor toner fusing, poor print quality, and excessive mechanical wear can result.

- 1 Open the Manual Tray and the rear output tray.

- 2 Load paper **with print side up**, and against the left edge of the tray.

Adjust the guide to the width of paper.

- 3 When you print on heavy paper, select **Bond** in the Paper Type section. then configure the paper source, and size in the software application. For details, see page 5.3.

Printing on Labels

Guidelines

- Only use labels recommended for laser printers.
- Verify that the labels' adhesive material can tolerate fusing temperature of 200°C (392°F) for 0.1 second.
- Make sure that there is no exposed adhesive material between the labels. Exposed areas can cause labels to peel off during printing, which can cause paper jams. Exposed adhesive can also cause damage to printer components.
- Do not feed a sheet of labels through the printer more than once. The adhesive backing is designed for one pass through the printer.
- Do not use labels that are wrinkled, bubbled, separated from the backing sheet, or damaged in any way.

- 1 Open the Manual Tray and the rear output tray.

- 2 Load labels **with print side up**, and against the left edge of the tray.

Adjust the guide to the width of paper.

- 3 When you print on labels, configure the paper source, type and size in the software application. For details, see page 5.3.

Note: To prevent them from sticking together, remove label sheet from the output tray as they are printed out.

Printing on Transparencies

Guidelines

- Only use transparencies recommended for use in laser printers.
- Make sure that the transparencies are not wrinkled or curled, and that they do not have any torn edge.
- Hold the transparencies by the edges and avoid touching the print side. Oils from your fingers that are deposited on the transparency can cause print quality problems.
- Be careful not to scratch or leave fingerprints on the print side.
- To prevent transparencies from curling, use the standard output tray. (This is for transparencies only; for other media, use the rear output tray to reduce curling.)

1 Open the Manual Tray by pulling it down toward you.

2 Load transparencies **with print side up, and the top with the adhesive strip entering the printer first.**

Adjust the guide to the width of paper.

4

3 When you print on transparencies, configure the paper source, type and size in the software application. For details, see page 5.3.

Notes:

- To prevent transparencies from sticking together, remove them from the output tray as they are printed.
- Place transparencies on a flat surface after removing them from the printer.

Printing on Preprinted Paper

Preprinted paper is paper that has some type of printing placed on it before it is sent through the printer. (paper that has a preprinted logo at the top of the page, for example)

Guidelines

- Letterheads must be printed with heat-resistant ink that will not melt, vaporize, or release hazardous emissions when subjected to the printer's fusing temperature of 400°F (205°C) for 0.1 second.
- Ink on letterheads must be non-flammable and should not adversely affect any printer rollers.
- Forms and letterheads should be sealed in a moisture-proof wrapping to prevent changes during storage.
- Before you load preprinted paper as forms and letterheads, verify that the ink on the paper is dry. During the fusing process, wet ink can come off preprinted paper.

- 1 Load letterheads into the tray you want to use as shown in the figures.

Adjust the guide to the width of paper.

Load with the design face down, bottom edge toward the printer.

- 2 When you print a document on the paper, configure the paper source, type and size in the software application. For details, see page 5.3.

Load with the design face up, top edge toward the printer.

Printing on Card Stock or Custom-sized Media

Postcards, 3 by 5 in. (index) cards and other custom-sized media can be printed with the ML-6040 printer. The minimum size is 98 by 148 mm (3.9 by 5.83 in.) and the maximum size is 216 by 356 mm (8.5 by 14 in.).

Guidelines

- Always insert the short-edge into the Manual tray first. If you want to print in landscape mode, make this selection through your software. Inserting paper long-edge first may cause a paper jam.
- Do not print on media smaller than 98 mm (3.9 in.) wide or 148 mm (5.83 in.) long.
- Set margins at least 6.4 mm (0.25 in.) away from the edges of the media in the software application.

1 Open the Manual Tray. Open the rear output tray and pull the extender out to its full-length position.

2 Load print media **with print side up, short edge first** and against the left edge of the tray.

Adjust the guide to the width of paper.

3 Configure the paper source, type and size in the printer driver's properties (see page 5.3) and print.

Note: If the size of your print media is not listed in the **Paper Size** box in the **Paper** tab of the printer driver properties, select **Custom Paper Size** and set the paper size manually.

chapter

5

Printing Tasks

This chapter explains your printing options and covers common printing tasks.

Topics included in this chapter are:

- ◆ Printing a Document
- ◆ Using Toner Save Mode
- ◆ Printing on Both Sides of the Paper (Manual Duplexing)
- ◆ Printing Multiple Pages on One Sheet of Paper (N-Up Printing)
- ◆ Scaling Your Document
- ◆ Fitting Your Document To a Selected Paper Size
- ◆ Printing Booklets
- ◆ Printing Posters
- ◆ Setting Graphic Properties
- ◆ Printing Watermarks
- ◆ Using Page Overlay
- ◆ Printing on a Network Environment
- ◆ Reprinting the Last Page

Printing a Document

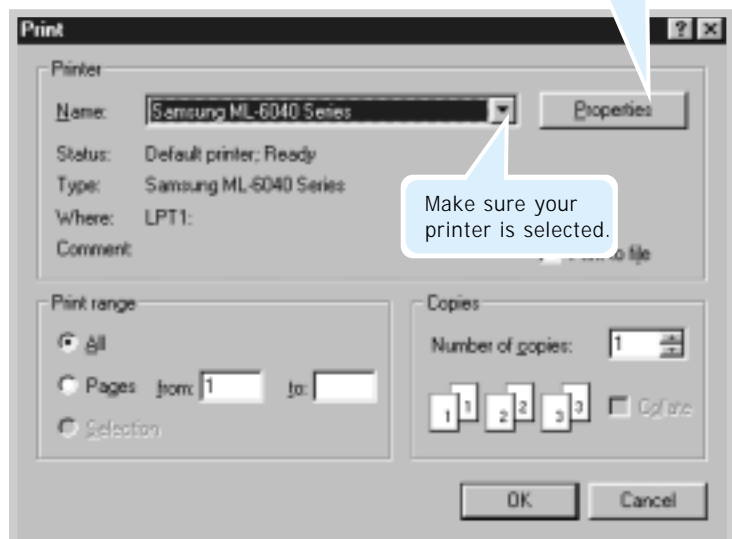

The following procedure describes the general steps required for printing from various Windows applications. The exact steps for printing a document may vary depending on the application program you are using. Refer to your software application's documentation for the exact printing procedure.

- 1 Open the document you want to print.
- 2 Select **Print** from the **File** menu. The Print dialog box for your application will be displayed (the Print dialog box for your application may look slightly different).

The basic print settings you will need are usually selected within this Print dialog box. These settings include the number of copies, paper size, and page orientation.

If you see a **Properties** button, click it. If you see **Setup**, **Printer**, or **Options**, click that button instead; then click **Properties** in the next screen.

Make sure your printer is selected.

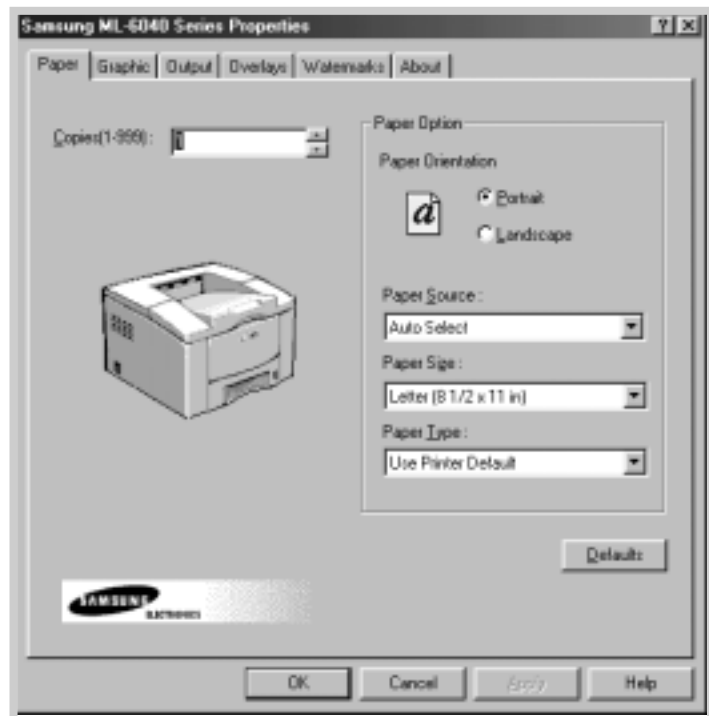

5

- 3 To take full advantage of the printer features provided by your ML-6040 printer, click **Properties** in the application's Print dialog box and go to step 4.

If you see **Setup**, **Printer**, or **Options**, click that button instead. Then click **Properties** in the next screen.

- 4 Now you see the Samsung ML-6040 Series printer's Properties dialog box. The Properties dialog box allows you to access all the information you will need when using your printer.

If necessary, click the **Paper** tab to display the settings shown below. The **Paper** tab contains the options for setting the basic paper handling.

The default paper source is **Auto Select**. If the paper source is set to **Auto Select**, the printer automatically selects the print media according to the following order: Manual Tray, Auto Tray.

Manual source is used when printing to special media. You have to feed one sheet at a time into the printer. See page 4.7.

The default paper type is **Use Printer Default**. If you load a different type of print media, select the corresponding paper type. For further information on print media, refer to chapter 4 'Print Media'.

Also, select the paper size you have loaded in your printer.

The **Paper Orientation** option allows you to select the direction in which information is printed on a page. **Portrait** prints across the width of the page, letter style. **Landscape** prints across the length of the page, spreadsheet style.

Landscape

Portrait

- 5 Click other tabs on the top of the Properties dialog box to access other features, if needed.
- 6 When you complete the print settings, click **OK** until the Print dialog box is displayed.
- 7 Click **OK** to start printing.

Notes:

- Most Windows applications will override settings you specify in the printer driver. Change all print settings available in the software application first, and change any remaining settings using the printer driver.
- The settings you change remain in effect only while you are using the current program. **To make your changes permanent**, make them in the Printers folder. Follow this procedure:

1. Click the Windows **Start** button.
2. Select **Settings**, then **Printers** to open the Printers window.

3. Select the **Samsung ML-6040 Series** printer icon.
4. Click the right mouse button and select **Properties** to open the properties window.

Canceling a Print Job

There are two ways to stop a print job.

To stop a print job from the ML-6040 printer

Press the **Cancel/Reprint** button on the control panel.

The printer will finish printing the page that is moving through the printer and delete the rest of the print job. Pressing **Cancel/Reprint** cancels only the current job in the printer. If more than one print job is in printer memory, **Cancel/Reprint** must be pressed once for each job.

To stop a print job from the Printers folder

1. From the **Start** menu, select **Settings**.
2. Select **Printers** to open the Printers window, then double-click the **Samsung ML-6040 Series**.
3. From the **Document** menu, select **Cancel Printing** (Windows 9x) or **Cancel** (Windows NT 4.0).

Printing Help

The Samsung ML-6040 printer has a help screen that can be activated by the **Help** button in the printer Properties dialog box. These help screens give detailed information about the printer features provided by the ML-6040 printer driver.

If you want to restore the default printer properties settings when you change the print settings, click **Defaults** in the Samsung ML-6040 Series Properties dialog box.

Using Toner Save Mode

Toner Save mode allows the printer to use less toner on each page. Selecting this option will extend the life of your toner cartridge and reduce your cost per page, but will reduce print quality.

There are two ways to enable the Toner Save mode.

To enable this feature from the ML-6040 series printer

Press the **Toner Save** button on the control panel. The printer must be in the ready mode (**Data** light is on).

- If the button backlight is on, toner save mode activates and the printer uses less toner to print a page.
- If the button backlight is off, toner save mode is disabled and the printer prints in the normal mode.

Note: To enable or disable the Toner Save mode from the control panel, the Toner Save Mode option in the printer driver must be set to **Print Setting**. See below.

To enable this feature from the software application

1. When you change the print settings from your software application, access the printer properties. See page 5.2 to access the printer properties.
2. Click the **Graphic** tab, and select the **Toner Save Mode** option. You can select from:
 - **Printer Setting:** If you select this option, this feature is determined by the setting you've made on the control panel of the printer.
 - **Standard:** If you don't need to save toner to print a document, select this option.
 - **Save:** Select this option to allow the printer to use less toner on each page.
3. Click **OK**.

Printing on Both Sides of the Paper (Manual Duplexing)

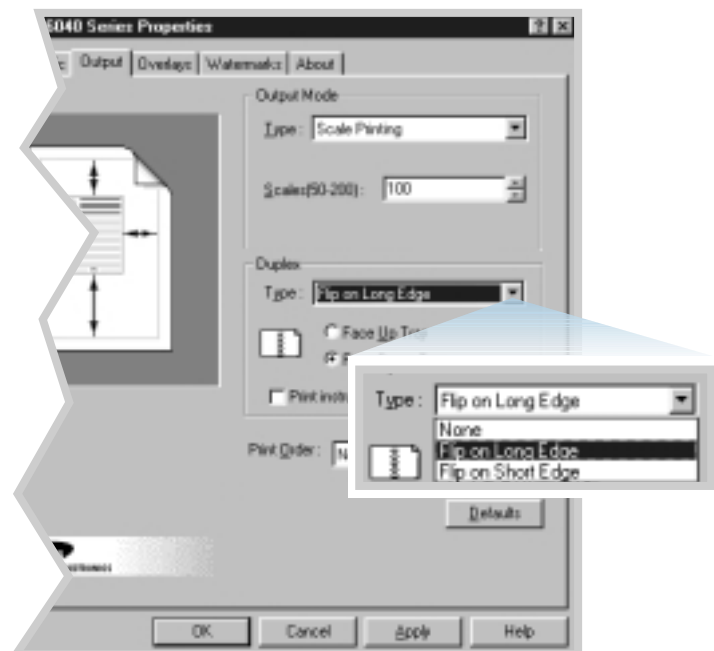

To print on both sides of the paper (manual duplexing), you must run the paper through the printer twice. You can print using the top output tray (face down tray) or the rear output tray (face up tray). Samsung recommends using the top output tray for light-weight paper. Use the rear output tray for any heavy media or media that tends to curl when printed, such as envelopes and card stock.

- 1 When you change the print settings from your software application, access the printer properties. See page 5.2 to access the printer properties.

From the **Paper** tab, select the paper orientation, source, size and type.

- 2 Click the **Output** tab, then choose **Flip on Long Edge** or **Flip on Short Edge** from the **Type** drop-down list in the **Duplex** section.

Printing on Both Sides of the Paper (Manual Duplexing)

Choosing **Flip on Long Edge** lets you place the binding orientation along the long edge of the paper, as in a magazine.

Choosing **Flip on Short Edge** lets you place the binding orientation along the short edge of the paper, as in a calendar.

▲
Flip on Long Edge in the
Portrait orientation

▲
Flip on Long Edge in the
Landscape orientation

◀ **Flip on Short
Edge** in the
Portrait
orientation

▲
Flip on Short Edge in the
Landscape orientation

- 3 Select **Face Down Tray** (top output tray) or **Face Up Tray** (rear output tray) in which the printed media is to be stacked. According to this option, the printer will determine the print page order when the second sides are printed.

If you select **Face Up Tray**, open the face up tray.

- 4 If you want to print the instruction page which tells you how to load the paper, click **Print Instruction sheet**. If the box is checked, the printer prints the instruction sheet before the duplexing job is printed. If the box is empty, this feature is disabled.

- 5 Start printing. The printer automatically prints only the odd-numbered pages.
- 6 Gather up the printed pages, and reload them into the Manual Tray one sheet at a time in the order that they are printed.

Note: If you have selected the **Face Up Tray** option in Step 3, the last page is placed on the top of the stack. **Do not** rearrange the pages before reloading them to print the second side.

Remove the printed pages, and reload them into the Manual Tray one sheet at a time with **the printed side face down**.

The following illustrations show you how to put the printed pages back into the printer.

(left edge toward the printer)

Flip on Long Edge in the **Landscape** orientation

(right edge toward the printer)

Flip on Short Edge in the **Landscape** orientation

(top edge toward the printer)

Flip on Long Edge in the **Portrait** orientation

(bottom edge toward the printer)

Flip on Short Edge in the **Portrait** orientation

Note: Duplexing can cause the printer to become dirty more quickly and can therefore reduce print quality. See “Cleaning the Printer” on page 6.4 if the printer becomes dirty.

- 7 You are prompted to reinsert the paper into the Manual Tray. Click **OK** on the screen to start printing the second side. The printer automatically prints only the even-numbered pages.

Note: You must press the **Demo** button to start printing each time you load the printed page into the Manual Tray.

Printing Multiple Pages on One Sheet of Paper (N-Up Printing)

▲ 4 pages per sheet

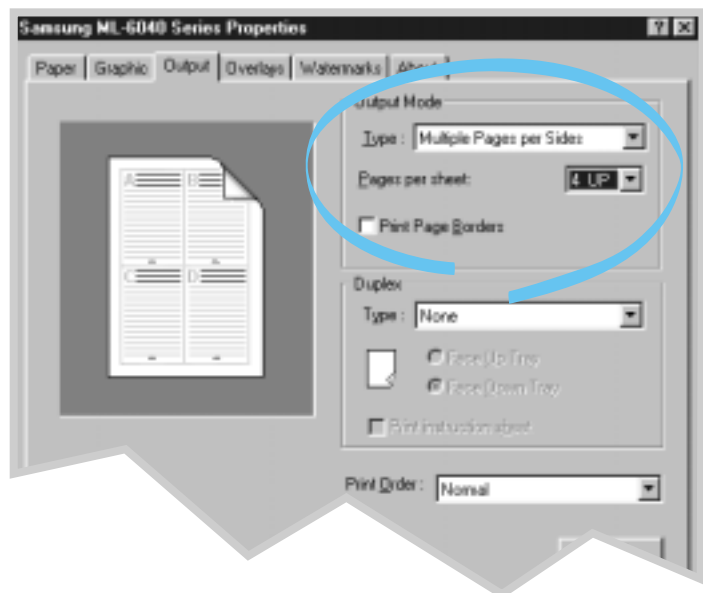

You can select the number of pages that you want to print on a single sheet of paper. If you choose to print more than one page per sheet, the pages will appear decreased in size and arranged on the sheet. You can specify up to 16 pages.

- 1 When you change the print settings from your software application, access the printer properties. See page 5.2 to access the printer properties.

From the **Paper** tab, select the paper orientation, source, size and type.

- 2 Click the **Output** tab, and choose **Multiple Pages per Side** in the **Type** drop-down list. Then select the number of pages you want to print per sheet (1, 2, 4, 9 or 16) in the **Pages per Sheet** drop-down list.

- 3 Click **Print Page Borders** if you want to print a border around each page on the sheet. **Print Page Borders** is enabled only if **Pages per Sheet** is 2, 4, 9, or 16.

- 4 Click **OK**, then start printing.

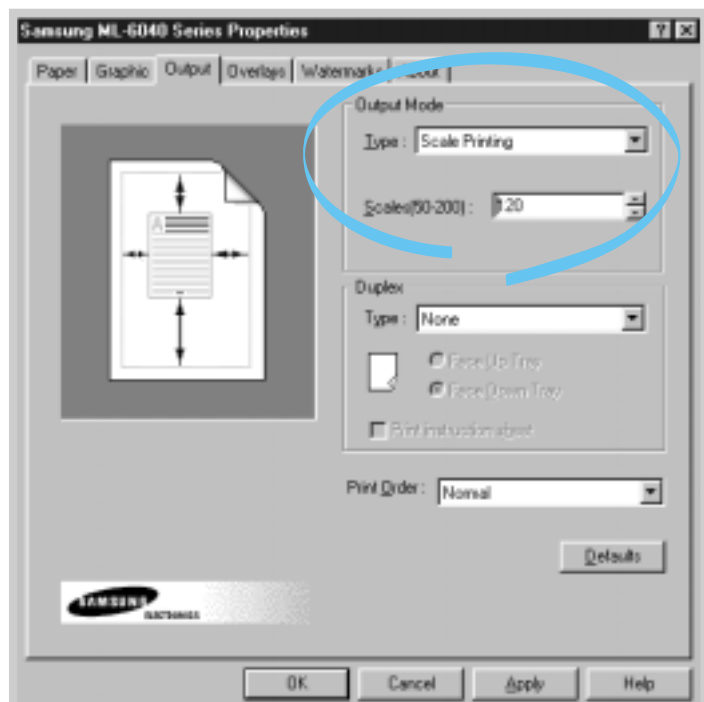

Scaling Your Document

This printer feature allows you to scale your print job on a page.

- 1 When you change the print settings from your software application, access the printer properties. See page 5.2 to access the printer properties.
- 2 Click the **Output** tab, and select **Scale Printing** in the **Type** drop-down list.
- 3 Enter the desired scaling rate in the **Scales** input field.

You can also click the ▲ or ▼ buttons.

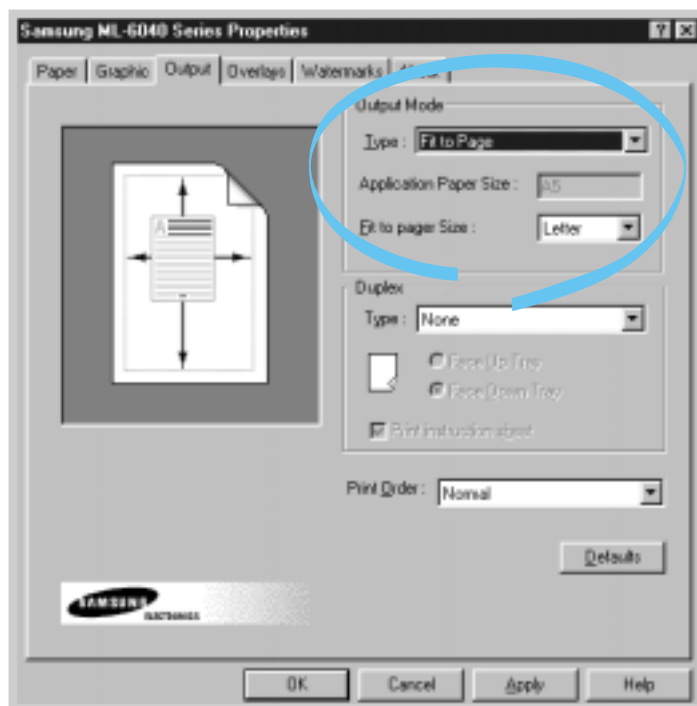

- 4 Click **OK**, then start printing.

Fitting Your Document To a Selected Paper Size

This printer feature allows you to scale your print job to any selected paper size regardless of the digital document size. This can be useful when you want to check fine details on a small document.

- 1 When you change the print settings from your software application, access the printer properties. See page 5.2 to access the printer properties.
- 2 Click the **Output** tab, and select **Fit to Page** in the **Type** drop-down list.
- 3 You'll see the **Application paper size** and then you will be prompted to select the **Fit to paper Size**. Select the correct size from the drop-down list.

- 4 Click **OK**, then start printing.

Printing Booklets

▲
Portrait orientation

▲
Landscape orientation

The Booklet printing feature allows you to print your document as a 2-sided (duplex) job and to arrange the pages so that the paper can be folded in half after printing to produce a booklet.

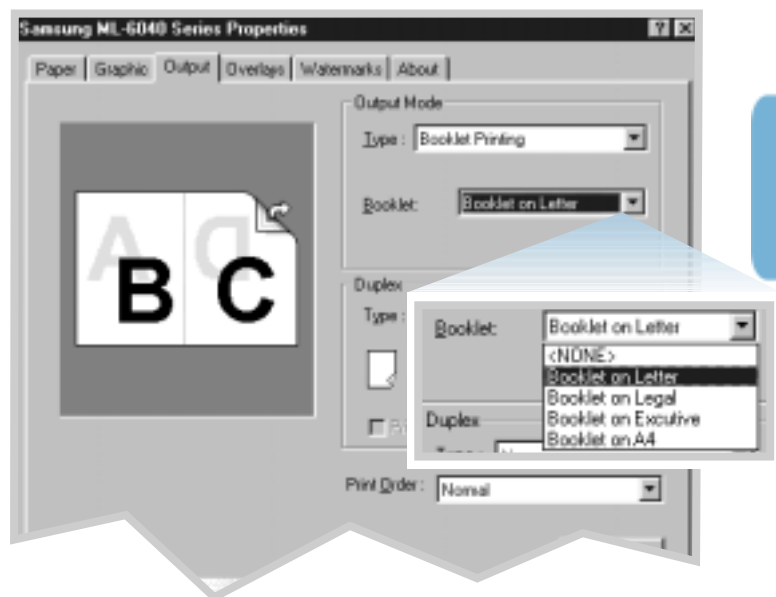

- 1 When you change the print settings from your software application, access the printer properties. See page 5.2 to access the printer properties.

From the **Paper** tab, select the paper orientation, source, size and type.

Note: For booklet printing, only four paper sizes are supported: Letter, A4, Legal, and Executive.

- 2 Click the **Output** tab, then choose **Booklet Printing** from the **Type** drop-down list.

Then select the paper size you are using from the **Booklet** drop-down list.

- 3 Select **Face Down Tray** (top output tray) or **Face Up Tray** (rear output tray) in which the printed media is stacked. According to this option, the printer will determine the print page order when the second sides are printed.

If you select **Face Up Tray**, open the face up tray.

- 4 If you want the instruction page which tells you how to load the paper, click **Print Instruction sheet**. If the box is checked, the printer prints the instruction page before the duplexing job is printed. If the box is empty, this feature is disabled.
- 5 Print the document.
- 6 The printer prints side one as shown below for an 8-page document.

▲ 8 page document

- 7 Gather up the printed pages, and reload them into the Manual Tray one sheet at a time. Go to the next page for details on reloading the printed pages.

Remove the printed pages, and reload them into the Manual Tray one sheet at a time with **printed side face down**.

Note: If you have selected the **Face Up Tray** option at Step 3, the last page is placed on the top of the stack. **Do not** rearrange the pages before reloading the pages.

The following illustrations show how to put the paper back into the printer.

▲ Face Up Tray output

In **Portrait** orientation, insert the pages with **left edge** toward the printer.

▲ Face Down Tray output

▲ Face Up Tray output

In **Landscape** orientation, insert the pages with **bottom edge** toward the printer.

▲ Face Down Tray output

- 8 You are prompted to reinsert the paper into the Manual Tray. Click **OK** on the screen. The printer will finish printing.

Note: You must press the **Demo** button to start printing each time you load the printed page into the Manual Tray.

- 9 Fold and staple the pages.

Printing Posters

Poster printing
with 2x2 style

This feature allows you to print a single-page document onto 4, 9, 16, 25, or 36 sheets of paper, for the purpose of pasting the sheets together to form one poster-size document.

- 1 When you change the print settings from your software application, access the printer properties. See page 5.2 for more information on accessing printer properties.

From the **Paper** tab, select the paper orientation, source, size and type.

- 2 Click the **Output** tab, and select **Poster Printing** in the **Type** drop-down list.

- 3 To determine the scaling factor, select the **Style**; **2x2**, **3x3**, **4x4**, **5x5** or **6x6**.

For example, if you select **2x2**, the output will be automatically stretched to cover 4 physical pages.

- 4 You may specify an overlap in millimeter or inch to make it easier to reconstruct the resulting poster.

- 5 Click **OK**, then start printing.

Setting Graphic Properties

Use the following options to adjust the print quality for your specific printing needs when you access the printer properties. See page 5.2 for more information on accessing printer properties.

If necessary, click the **Graphic** tab to display the settings shown below.

Resolution

You can select the printing resolution by choosing either **300 dpi** or **600 dpi**. The higher the setting, the sharper the clarity of printed characters and graphics. Higher settings may increase the time it takes to print a document.

SRT Mode

Some printed characters or images appear to have jagged or uneven edges. Set this Samsung Resolution enhancement Technology (SRT) option to improve the print quality of your text and image and make the characters and images appear smoother.

- **Printer Default** – Choose this setting to use SRT that your printer provides.
- **Normal** – SRT mode is disabled. Choose this setting if graphics, particularly scanned images, are not printing clearly.
- **Text Enhance** - This setting refines the print quality of characters by smoothing out jagged edges that can occur on the angles and curves of each character.
- **Image Enhance** - This setting refines the print quality of photo images using SRT.

Note: Text Enhance and Image Enhance are disabled when the 300 dpi setting is selected.

Graphic Mode

Configure the printer to process graphics as raster or vector images. Setting this option tells Windows how to send graphic images to the printer. All graphics can be printed as raster images, however some geometric shapes or patterns print faster if they are printed as vector graphics.

- **Vector** – If you select the **Vector** setting, Windows will send graphics to the printer as a mixture of vector and bit map images.
- **Raster** – When you select the **Raster** setting, Windows will send all graphics to the printer as bit map images.

Note: Not all graphic images can print using the **Vector** setting. If you are using the **Vector** setting, and your graphic images do not print as they appear on your computer screen, select the **Raster** setting and reprint your graphic. (Window 9x only)

Darkness

Use this option to lighten or darken the image appearance in your print jobs.

- **Normal** – This setting is for normal documents.
- **Light** – This setting is for bolder line widths or darker gray-scale images.
- **Dark** – This setting is for finer line width, higher definition in graphics, and lighter gray-scale images.

Reprint

You can set the printer not to print the last page of the last job when the **Cancel/Reprint** button is pressed. For details, see 'Reprinting the Last Page' on page 5.30.

Reprint When Jam

With this option **On**, the printer keeps the image for a printed page until the printer signals that the page has successfully exited the printer. If a paper jam occurs, the printer will automatically reprint all jammed pages after the jam is cleared.

Power Save Mode

To conserve power when a printer is idle, you can set the printer to enter a reduced power state after completing a print job, according to a time specified by you in the Power save Mode box.

Select the desired length of time from the drop-down list.

If your printer is constantly used, select **OFF** to keep the printer ready to print with the minimum warm-up time. This uses more energy to keep the printer warm and ready to print.

Printing Watermarks

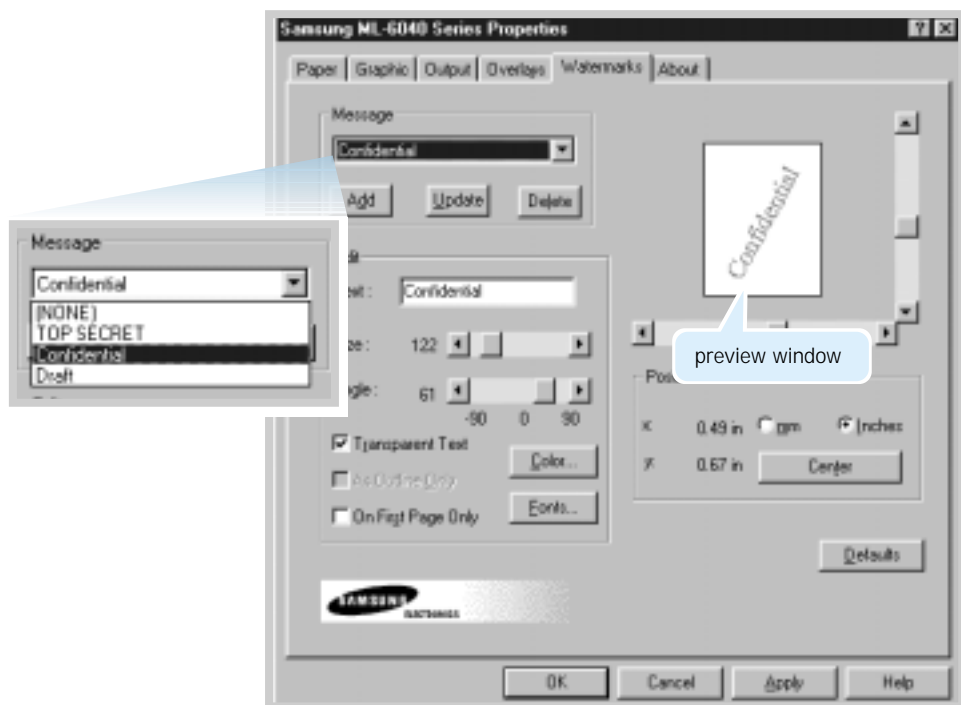

The Watermark option allows you to print text over an existing document. For example, you may want to have large gray letters reading “Draft” or “Confidential” printed diagonally across the first page or all pages of a document.

There are several predefined watermarks that come with the ML-6040 series printer, and they can be modified or you can add new ones to the list.

To use an existing watermark

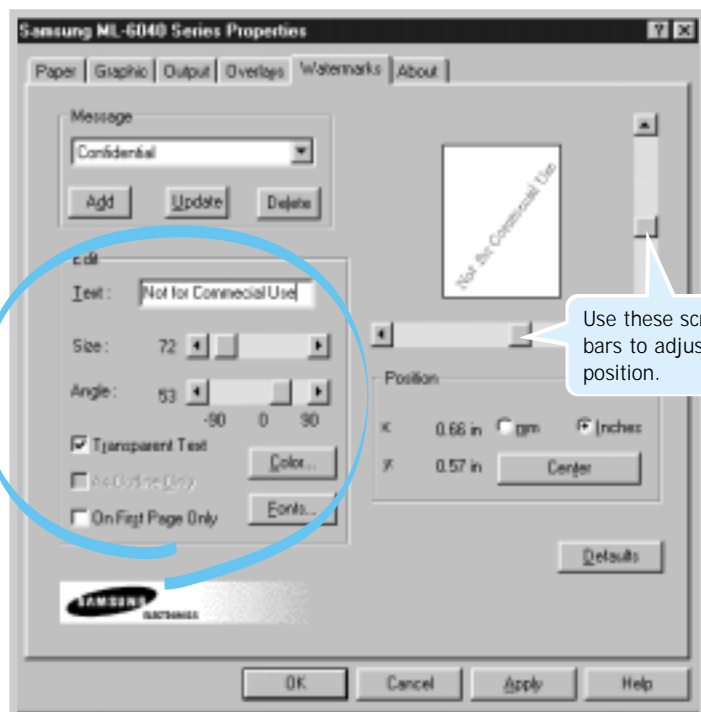

- 1 When you change the print settings from your software application, access the printer properties. See page 5.2 for more information on accessing printer properties.
- 2 Click the **Watermark** tab, and select the desired watermark in the **Message** drop-down list. You will see the selected watermark in the preview window.

- 3 Click **OK**, then start printing.

To create or edit a watermark

- 1 When you change the print settings from your software application, access the printer properties. See page 5.2 for more information on accessing the printer properties.
- 2 Click the **Watermark** tab, and enter the desired text message in the **Text** field. This will be displayed in the preview window. The preview window is provided so that you can see how the watermark will appear on the printed page.
- 3 Select the desired watermark options. You can select the font type and size, color and angle. There are three checkboxes at the bottom of the dialog box:
 - **Transparent Text** – Allows the document to show through the watermark.
 - **As Outline Only** – Prints the text outline of the watermark. This setting globally effects all watermarks in the list.
 - **On First Page Only** – Prints the watermark only on the first page.

- 4 If you have created a new or edited an existing watermark, the **Add** and **Update** button is enabled.

To add a new watermark to the list, click **Add**.

- 5 If you want to edit, select the desired watermark from the list, edit, then click **Update**.

- 6 When you complete the edit, click **OK**, then start printing.

To stop printing the watermark, select **None** in the Message drop-down list.

To delete a watermark

- 1 When you change the print settings from your software application, access the printer properties. See page 5.2 for more information on accessing the printer properties.
- 2 From the **Watermark** tab, select the watermark you want to delete in the **Messages** drop-down list.
- 3 Click **Delete**.
- 4 Click **OK**.

Using Page Overlay

What is an Overlay?

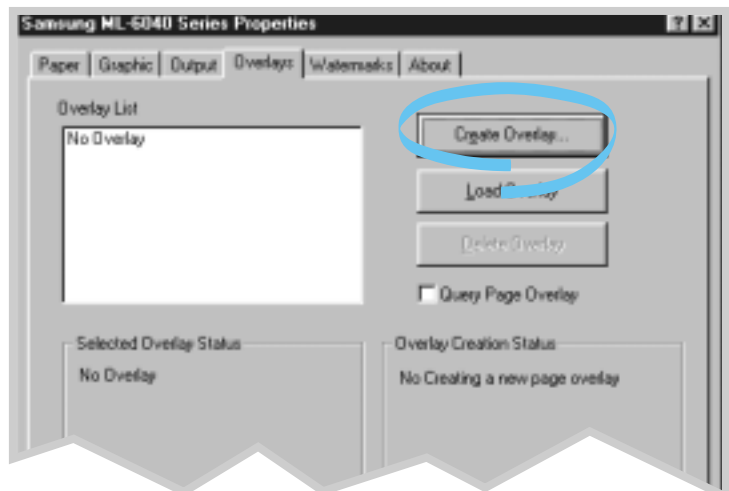

An overlay is text and/or images stored in the computer HDD as a special file format that can be printed on any document you choose. Overlays are often used to take the place of preprinted forms and letterhead paper. Rather than using preprinted letterhead, for example, you can create an overlay containing the exact same information that is currently on your letterhead. Then when you want to print a letter with your company's letterhead, you do not need to load preprinted letterhead paper in the printer. You need only to tell the printer to print the letterhead overlay on your document.

Creating a New Page Overlay

To use a page overlay, you must create a new page overlay containing your logo or image.

- 1 Create or open a document containing a text or image you want to use for page overlay. Position the items exactly as you wish them to appear when printed as an overlay. If needed, save the file for later use.
- 2 Select **Print** from the **File** menu. Then click **Properties** in the application's Print dialog box to access the printer properties. For details, see page 5.2.
- 3 Click the **Overlays** tab, and click **Create Overlay**.

- 4 In the Create Overlay dialog box, type a name of up to eight characters in the **File name** box. Select the destination path if necessary. (The default is C:\FORMOVER).

- 5 Click **OK**. You will see the name in the **Overlay List** box.
- 6 Click **OK** or **Yes** until you complete the creation.

The file is not printed out. Instead it will be stored on your computer HDD disk.

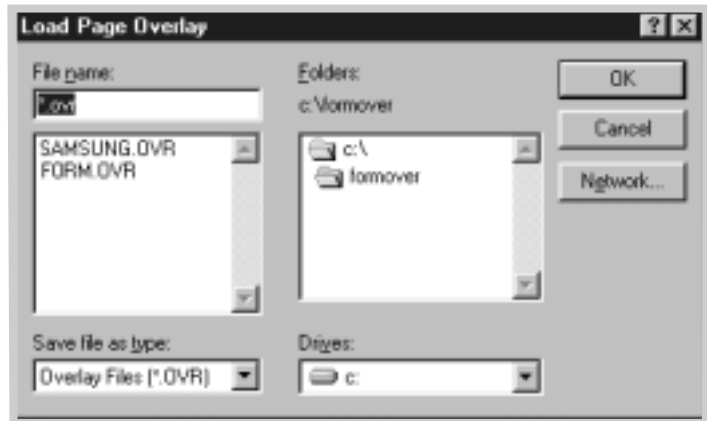

Note: The overlay document size must be the same as documents you will print with the overlay. Do not create overlay with the watermark.

Using Page Overlay

After an overlay has been created, it is ready to be printed with your document. To print an overlay with a document:

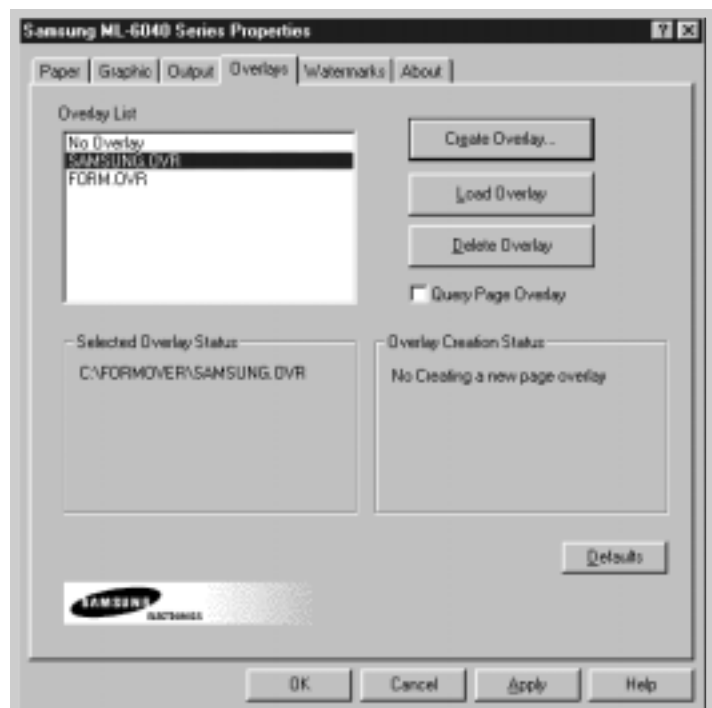

- 1 Create or open the document you want to print.
- 2 When you change the print settings from your software application, access the printer properties. See page 5.2 to access the printer properties.
- 3 Click the **Overlays** tab, and select the desired overlay from the **Overlay List** box.

- 4 If the desired overlay file does not appear in the **Overlay List** box, click **Load Overlay**, and select the overlay file.

If you have stored the overlay file you want to use into an external source, you can also load the file when you access this Load Overlay window.

After you select the file, click **OK**. The file is now shown in the **Overlay List** box and is available for printing. Select the overlay from the **Overlay List** box.

- 5 If necessary, click **Query Page Overlay**. If this box is checked, a message box will appear each time you submit a document for printing, asking you to confirm your wish to print an overlay on your document.

Answering **Yes** to the message box means that the selected overlay will be printed with your document.

Answering **No** to the message box cancels overlay printing.

If this box is empty, and an overlay has been selected, the overlay will be automatically printed with your document.

- 6 Click **OK** or **Yes** until the printing starts.

The selected overlay will be downloaded with your print job and printed on your document.

Note: The overlay document resolution must be save as document you will print with the overlay.

Deleting a Page Overlay

You can delete page overlays that are no longer used.

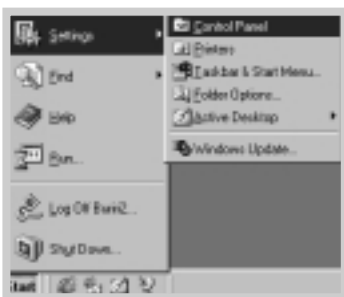

- 1 In the printer properties dialog box, click the **Overlays** tab.
- 2 Select the overlay you want to delete from the **Overlay List** box.
- 3 Click **Delete Overlay**.
- 4 Click **OK** until you exit the Print dialog box.

Printing on a Network Environment

If you work in a network environment, you can connect your printer directly to a selected computer (called the “host computer”) on the network. The printer can then be shared by other users on the network through a Windows 9x, or NT 4.0 network printer connection.

Note: You need to install the Samsung ML-6040 Printer driver on each computer that will print documents to the printer.

Setting Up Host Computer

- 1 Start Windows.
- 2 From the **Start** menu, select **Control Panel**, and double-click on the **Network** icon.
- 3 Check the **File and Print Sharing** box, then click **OK**. Close the window.
- 4 Click **Start** and select **Printers** from **Settings**, then double-click your printer name.
- 5 Select **Properties** in the **Printers** menu.
- 6 Click the **Sharing** tab, then check the **Shared As** box. Fill in the Shared Name field, then click **OK**.

Setting Up Client PC

- 1 Right-click **Start**, and select **Explorer**.
- 2 Open your network folder in the left column.
- 3 Right-click the shared name, and select **Capture Printer Port**.
- 4 Select the port you want, check the **Reconnect at log on** box, then click **OK**.
- 5 From the **Start** menu, select **Settings**, then **Printers**.
- 6 Double-click your printer icon.
- 7 From the **Printers** menu, select **Properties**.
- 8 Press the **Details** tab, select the printer port, then click **OK**.

Reprinting the Last Page

The Samsung ML-6040 printer's memory always keep the last page of the last job. If you canceled a print job due to a paper jam or other problems and you want to know which page was printed last, reprint the last page.

Press **Cancel/Reprint** briefly in the ready mode.

Note: If you want to prevent somebody from reprinting your document, you can turn the Reprinting feature off in the printer's properties dialog box. When you turn the feature off in the printer's properties, the **Cancel/Reprint** button on the control panel does not perform the reprinting operation.

To disable this feature:

1. From the **Start** menu, select **Settings** and then **Printers**.
2. Click the right mouse button on the **Samsung ML-6040 Series** printer icon and select **Properties** to open the properties window.
3. From the **Graphic** tab, Select **Off** from the **Reprint** drop-down list.

With this option Off, you cannot reprint the last page from the control panel.

When you want to reprint the last page on the control panel, you must select **On** from the list.

4. Click **OK**.

6

Maintaining Your Printer

This chapter provides suggestions for high-quality and economical printing and information for maintaining the toner cartridge and the printer.

Topics included in this chapter are:

- ◆ Maintaining Toner Cartridge
- ◆ Cleaning the Printer

Maintaining Toner Cartridge

Toner cartridge storage

To get the most from the toner cartridge, keep the following guidelines in your mind.

- Do not remove the toner cartridge from its package until you are ready to use it. The shelf life of a cartridge in an unopened package is approximately 2 years. The shelf life of a cartridge in an opened package is approximately 6 months.
- Do not refill toner cartridges. **The printer warranty does not cover damage caused by using a refilled cartridge.**
- Store toner cartridges in the same environment as the printer.
- Do not remove a toner cartridge from the printer except to replace it, clean it or clear a paper jam. Replace the cartridge immediately.
- To prevent damage to the toner cartridge, do not expose it to light for more than a few minutes.

Toner cartridge life expectancy

The life of the toner cartridge depends on the amount of toner that print jobs require. When printing text at 5 % coverage, a new toner cartridge lasts an average of 6,000 pages. (But, the toner cartridge supplied with the printer lasts an average of 3,000 pages.)

Recycling toner cartridge

After you install a new toner cartridge (see page 2.2), follow the instructions included in the toner cartridge box to recycle the old cartridge.

Saving toner

To save toner, press the **Toner Save** button on the printer control panel. The button will be lit. You can also enable the **Toner Save Mode** in your printer properties. Refer to “Using Toner Save Mode” on page 5.6. Selecting this option will expand the life of the toner cartridge and reduce your cost per page, but will reduce print quality.

Redistributing Toner

When toner is low, faded or light areas may appear on a printed page. You may be able to temporarily improve print quality by redistributing the toner. The following procedures may allow you to finish the current print job before replacing the toner cartridge.

- 1 Open the top cover.

- 2 Remove the toner cartridge from the printer.

CAUTIONS:

- Avoid reaching too far into the printer. **The fusing area may be hot.**
- To prevent damage to the toner cartridge, **do not expose it to light for more than a few minutes.**

- 3 Gently shake the toner cartridge from side to side 5 or 6 times to redistribute the toner.

Note: If the toner gets on your clothing, wipe it off with a dry cloth and wash clothing in cold water. **Hot water sets toner into fabric.**

- 4 Reinsert the toner cartridge into the printer. Be sure that the toner cartridge is firmly in its place.

- 5 Firmly close the cover.

6

If the print remains light

Remove the old cartridge and install a new toner cartridge. See "Install the Toner Cartridge" on page 2.2.

Cleaning the Printer

To maintain print quality, follow the cleaning procedures below every time the toner cartridge is replaced or whenever print quality problems occur. As much as possible, keep the printer free from dust and debris.

Notes:

- Do not use ammonia-based cleaners or volatile solvents such as thinner, on or around the printer. These can damage the printer.
- While cleaning the inside of the printer, be careful not to touch the transfer roller (located underneath the toner cartridge). The oil from your hands on the roller can cause print quality problems.

Cleaning the Outside

Wipe the outside surface of the printer with a soft, clean, lint-free cloth. You can dampen the cloth slightly with water, but be careful not to let any water drip onto the printer or inside of it.

Cleaning the Inside

During the printing process, paper, toner, and dust particles can accumulate inside the printer. Over time, this buildup can cause print quality problems such as toner specks or smearing. Cleaning inside the printer will eliminate or reduce these problems.

Cleaning inside the printer

- 1 Turn the printer off and unplug the power cord, then wait for the printer to cool.
- 2 Open the top cover and remove the toner cartridge.
- 3 With a dry, lint-free cloth, wipe away any dust and spilled toner from the toner cartridge area and the toner cartridge cavity.

Note: To prevent damage to the toner cartridge, do not expose it to light for more than a few minutes. Cover it with a piece of paper, if necessary. Also, do not touch the black transfer roller inside the printer. By doing so, you can damage the printer.

- 4 Locate the long strip of glass (LSU) inside the top of the cartridge compartment, and gently swab the glass to see if dirt turns the white cotton black.

- 5 Reinsert the toner cartridge and close the top cover. Then, turn the printer on.

Printing a cleaning sheet

Printing a cleaning sheet cleans the drum inside the toner cartridge. Use this process if you are experiencing blurred, faded or smeared printouts. This process will produce a page with toner debris, which should be discarded.

- 1 Make sure the printer is turned on and in the ready state and that there is paper loaded in the paper tray.
- 2 Press and hold **Demo** on the control panel for about 10 seconds until all control panel lights remain steadily lit, then release.

Note: The cartridge cleaning process takes some time. To stop the printing, **turn the power off**.

- 3 Your printer automatically picks up a sheet of paper from the paper tray and prints out a cleaning sheet with the dust or toner particles on it.

chapter

7

Problem Solving

This chapter gives helpful information for what to do if you encounter a printer error. It provides information on the following topics:

- ◆ Troubleshooting Checklist
- ◆ Solving General Printing Problems
- ◆ Clearing Paper Jams
- ◆ Solving Print Quality Problems
- ◆ Troubleshooting Error Messages
- ◆ Common Windows Problems

Troubleshooting Checklist

If the printer is not working properly, complete the following checklist in order. If the printer does not pass a step, follow the corresponding troubleshooting suggestions.

Check	Solution
Make sure that the Data light on the control panel is on.	<ul style="list-style-type: none">• If no lights are on, check the power cord connection. Check the power switch. Check the power source by plugging into another outlet.• If other lights are on, go to "Troubleshooting Error Messages" on page 7.19.
Press the Demo button to print a demo page to verify that the printer is feeding paper correctly. See page 2.8.	<ul style="list-style-type: none">• If a demo page does not print, check the paper supply in the paper tray.• If the paper jams in the printer, go to "Clearing Paper Jams" on page 7.6.• If the Error indicator light is illuminated on the control panel, go to "Troubleshooting Error Messages" on page 7.19.
Check the demo page to see if it is printed correctly.	If there is a print quality problem, go to "Solving Print Quality Problems" on page 7.13.
Print a short document from a software application to verify that the computer and printer are connected and are communicating correctly.	<ul style="list-style-type: none">• If the page does not print, check the cable connection between the printer and computer.• Check the print queue or print spooler (print monitor in Mac) to see if the printer has been paused.• Check the software application to make sure you are using the proper printer driver and communication port. If the page is interrupted during printing, go to "Solving General Printing Problems" on page 7.2.
If completing the checklist did not diagnose the problem with the printer, check the following troubleshooting sections.	<ul style="list-style-type: none">• "Solving General Printing Problems" on page 7.2.• "Troubleshooting Error Messages" on page 7.19.• "Common Windows Problems" on page 7.21.

Solving General Printing Problems

If you have any problems with the operation of your ML-6040 printer, refer to the table for suggested solutions.

Problem	Possible Cause	Solution
The printer does not print.	The printer is not receiving power.	If no lights are on, check the power cord connections. Check the power switch and the power source.
	Your printer is not selected as the default printer.	Select Samsung ML-6040 Series as your default printer.
	Check the printer for the following:	<ul style="list-style-type: none">• The printer cover is not closed.• Paper is jammed.• No paper is loaded.• Toner cartridge is not installed.• Printer system error occurs. Contact a service representative.
	The printer may be in manual feed mode and out of paper. (The Manual and the Data lights are blinking.)	Add paper to the Manual tray, and press the Demo button on the printer's control panel.
	The connection cable between the computer and the printer is not connected properly.	Disconnect the printer cable and reconnect it.
	The connection cable between the computer and the printer is defective.	If possible, attach the cable to another computer that is working properly and print a job. You may also try using a different printer cable.
	The port setting is incorrect.	Check the Windows printer setting to make sure that the print job is sent to the correct port (for example, LPT1). If the computer has more than one port, make sure the printer is attached to the correct one.

Problem	Possible Cause	Solution
The printer does not print. (continued)	The printer may be configured incorrectly.	Check the printer properties to make sure that all print settings are correct.
	The printer driver may be incorrectly installed.	Uninstall the printer driver, then reinstall the printer driver. Try printing a demo page.
	The printer is malfunctioning.	Check the lights on the control panel to determine if the printer is indicating a system error.
Printer selects media from the wrong paper source.	The paper source selection in the printer properties may be incorrect.	For many software applications the paper source selection is found under the Paper tab within the printer properties. Select the correct paper source.
Paper does not feed into the printer.	Paper has not been loaded correctly.	Remove paper from the paper tray and reload it correctly.
	There is too much paper in the paper tray.	Remove excess paper from the tray.
	The paper is too thick.	Use only paper that meets the specifications required by the printer.
Print job is extremely slow.	The job may be very complex.	Reduce the complexity of the page or try adjusting the print quality settings. If this problem occurs frequently, add memory to the printer.
	The maximum speed of 12 pages per minute cannot be exceeded even when more memory is added.	
	If using Windows 95, the Spooling Setting may be set incorrectly.	From the Start menu, choose Settings and Printers . Right-click the Samsung ML-6040 Series printer icon, choose Properties , click the Details tab, and then choose the Spool Settings button. Select the desired spool setting from the available choices.

Solving General Printing Problems

Problem	Possible Cause	Solution
Half of the page is blank.	The page layout is too complex.	Simplify the page layout and remove any unnecessary graphics from the document, if possible.
	The page orientation setting may be incorrect.	Change the page orientation in your application.
	The paper size and the paper size settings do not match.	Make sure that the paper size in the print settings matches the paper in the paper tray.
The paper keeps jamming.	There is too much paper in the paper tray.	Remove excess paper from the tray. If printing special media, use the Manual Tray.
	An incorrect type of paper is being used.	Use only paper that meets the specifications required by the printer.
	An incorrect output method is being used.	Media such as thick paper should not be printed using the standard face-down stacker. Use the rear face-up output tray instead.
	There may be debris inside the machine.	Open the top cover and remove the debris.
The printer prints, but the text is wrong, garbled, or incomplete.	The printer cable is loose or defective.	Disconnect the printer cable and reconnect it. Try a print job that you know works. If possible, attach the cable and printer to another computer and try a print job that you know works. Finally, try a new printer cable.
	The wrong printer driver was selected.	Check the application's printer selection menu to make sure that your printer is selected.

Problem	Possible Cause	Solution
The printer prints, but the text is wrong, garbled, or incomplete. (continued)	The software application is malfunctioning.	Try printing a job from another application.
	The operating system is malfunctioning.	If printing from Windows (any version), exit to a Dos prompt and verify functionality with the following command: At a C:\ prompt, type Dir LPT1 , then press Enter . (This assumes you are connected to LPT1.) Exit Windows and reboot the computer. Turn the printer off and then back on again.
Pages print, but are totally blank.	The toner cartridge is defective or out of toner.	Replace the toner cartridge.
	The sealing tape may still be in the toner cartridge.	Remove the toner cartridge and pull out the sealing tape. Reinstall the toner cartridge, and check by printing a demo page.
	The file may have blank pages.	Check the file to make sure that it does not contain blank pages.
	Some parts, such as the controller or the board, may be defective.	Contact a service representative.

Clearing Paper Jams

Occasionally, paper can become jammed during a print job. Some of the causes include:

- The paper tray is loaded improperly or overfilled.
- The paper tray has been pulled out during a print job.
- The top cover has been opened during a print job.
- Paper that does not meet paper specifications has been used. See “Paper Specifications” on page A.2.
- Paper that is outside of the supported size range has been used. See “Paper Specifications” on page A.2.

If a paper jam occurs, the **Paper** and the **Error** lights remain lit on the control panel. Find and remove the jammed paper. If the location of the paper jam is not obvious, look inside the printer.

Output Area

Note: Paper jams in this area may result in loose toner on the page. If you get any toner on your clothes, wash them in cold water because hot water will set the toner into the fabric.

- 1 If the paper is almost completely visible from the top output tray, pull the remaining paper carefully out of the printer.

- 2** If the jammed paper is not visible or there is resistance when you pull the paper, open the rear output tray.

- 3** Remove the stopper as shown, then push the tray down so that it is open at 90 degrees angle.

- 4** If there is resistance when you pull the paper, squeeze the handle on the right end of the exit roller **1**, then pull the roller in the direction of arrow **2**.

- 5** Remove the jammed paper.

Clearing Paper Jams

6 Replace the exit roller.

Make sure that you click the right end of the roller back in place. If you fail to do so, the printer system will recognize that the printer cover is open or that a system fuser error has occurred, and the **Error** light on the control panel will turn on.

7 Replace the stopper as shown, and close the rear output tray.

8 To resume printing, open the top cover, and then close it again.

Note: If the **Paper** and the **Error** lights do not turn off, there is still jammed paper inside the printer. Check the input area and the inside of the printer.

Input Area

Note: If paper has entered the toner cartridge area, follow the instructions on page 7.10. It is easier to remove such jams from the inside of the printer than the paper input area.

- 1 Slide out Auto tray to expose the jammed paper.

- 2 Remove any misfed paper by pulling it out by the visible edge from the tray. Make sure that all of the paper is properly aligned in the tray.

Note: If the paper is jammed in the paper feed area and cannot be accessed from inside the printer, remove Tray 1 from the printer and carefully pull the jammed paper free from the printer.

- 3 Slide the tray back into the printer.

Clearing Paper Jams

- 4 To resume printing, open the top cover, and then close it again.

Note: If the **Paper** and the **Error** lights do not turn off, there is still jammed paper inside the printer. Check the inside of the printer.

Inside the Printer

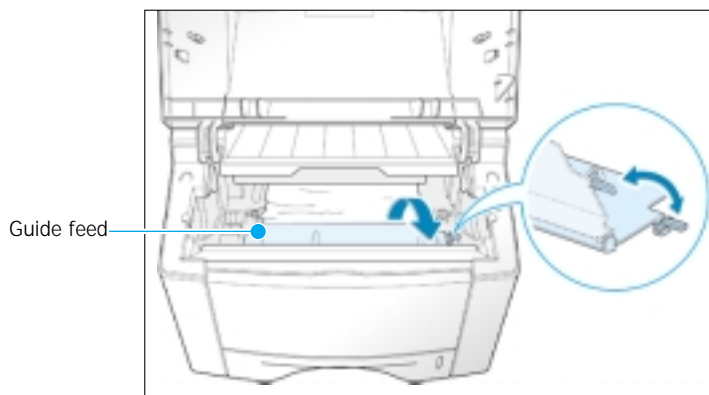

Note: Paper jams in this area may result in loose toner on the page. If you get any toner on your clothes, wash them in cold water because hot water will set the toner into the fabric.

- 1 Open the top cover and remove the toner cartridge.

CAUTION: To prevent damage to the toner cartridge, do not expose it to light for more than a few minutes. Place a piece of paper over the top of the toner cartridge to shield it while it is out of the printer.

- 2 Carefully lift up the guide feed.

- 3 Gently pull the paper toward you to remove it from the printer.

- 4 Flip down the guide feed, and reinstall the toner cartridge.

Note: If the toner cartridge is difficult to reinstall, make sure the guide feed has been flipped back down into position.

- 5 Close the top cover. Printing can be resumed.

Tips for Avoiding Paper Jams

By selecting correct paper types and loading them properly, you should be able to avoid most paper jams. If paper jams occur, follow the steps outlined in “Clearing Paper Jams” on page 7.6. If jams occur frequently, make sure you are following these tips to avoid jams.

- Follow the procedures in “**Load Paper**” on page 2.4 to load the paper properly. Make sure the adjustable guides are positioned correctly.
- Do not overload the paper tray. Make sure the paper is under the paper capacity mark on the inside of the paper tray.
- Do not pull out the paper tray while print jobs are in process.
- Flex, fan and straighten the paper before loading it.
- Do not load stacks of labels or transparencies in the Auto Tray. Labels or transparencies must be fed using the Manual Tray.
- Do not load wrinkled, creased, damp or highly curled paper.
- Do not mix paper types in the paper tray.
- Use only recommended print media. See “Paper Specifications” on page A.2.
- Make sure that the recommended print side is facing down when loading the paper into the Auto Tray and facing up when loading into the Manual Tray.
- Keep print media stored in an acceptable environment.

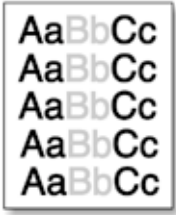

Solving Print Quality Problems

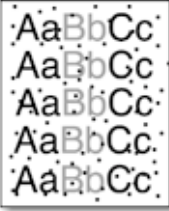

Print Quality Checklist

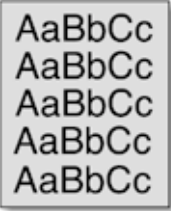

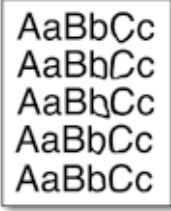

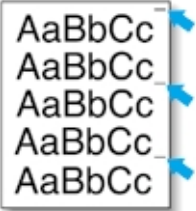

General print quality problems can be solved by following the checklist below.

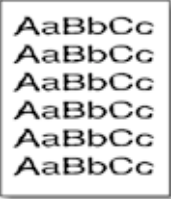

- Check the printer properties to make sure that you are using the best available print quality option (see page 5.18).
- Redistribute the toner in the toner cartridge (see page 6.2).
- Clean the inside of the printer (see page 6.4).
- Adjust the print resolution from the printer properties (see page 5.18).
- Check to make sure that Toner Save Mode is off (see page 5.6).
- Troubleshoot general printing problems (see page 7.2).
- Install a new toner cartridge, then check print quality again (see page 2.2).

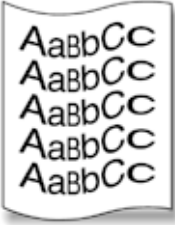

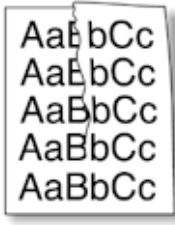

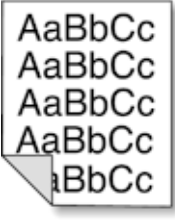

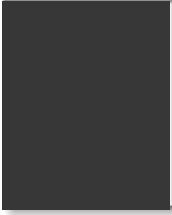

Solving Print Quality Problems

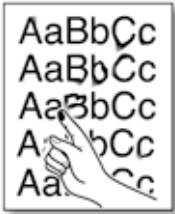

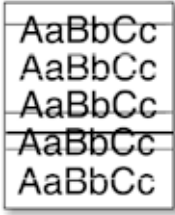

Problem	Solution
<p>Light or faded print</p> 	<p>If a vertical white streak or faded area appears on the page:</p> <ul style="list-style-type: none">• The toner supply is low. You may be able to temporarily extend the toner cartridge life. See “Redistributing the Toner” on page 6.2. If this does not improve the print quality, install a new toner cartridge.• The paper may not meet paper specifications (for example, the paper is too moist or too rough). See “Paper Specifications” on page A.2.• If the whole page is light, the print resolution setting is too light or Toner Save Mode may be on. Adjust the print resolution and darkness setting within the printer properties. See page 5.18 and 5.20 respectively.• A combination of faded and smeared defects may indicate that the toner cartridge needs cleaning. See “Cleaning the Printer” on page 6.4.• The surface of the LSU part inside the printer may be dirty. Clean the LSU (see page 6.5).

Problem	Solution
<p>Toner specks</p> 	<ul style="list-style-type: none"> • The paper may not meet paper specifications (for example, the paper is too moist or too rough). See “Paper Specifications” on page A.2. • The transfer roller may be dirty. See “Cleaning the Inside” on page 6.4. • The paper path may need cleaning. See “Cleaning the Inside”.
<p>Dropouts</p> 	<p>If faded areas, generally rounded, occur randomly on the page:</p> <ul style="list-style-type: none"> • A single sheet of paper may be defective. Try reprinting the job. • The moisture content of the paper is uneven or the paper has moist spots on its surface. Try a different kind or brand of paper. See “Paper Specifications” on page A.2. • The paper lot is bad. The manufacturing processes can cause some areas to reject toner. Try a different kind or brand of paper. • The toner cartridge may be defective. See “Repetitive vertical defects” on page 7.15. • If these steps do not correct the problems, contact a service representative.
<p>Vertical lines</p> 	<p>If black vertical streaks appear on the page:</p> <ul style="list-style-type: none"> • The photosensitive drum inside the toner cartridge has probably been scratched. Install a new toner cartridge. <p>If white vertical streaks appear on the page:</p> <ul style="list-style-type: none"> • The surface of the LSU part inside the printer may be dirty. Clean the LSU (see page 6.5).

Problem	Solution
<p>Gray background</p> 	<p>If the amount of background toner shading becomes unacceptable, the procedures below may help to clear the condition:</p> <ul style="list-style-type: none"> • Change the paper to a lighter basis weight. See “Paper Specifications” on page A.2. • Check the printer’s environment; very dry (low humidity) or high humidity (higher than 80 % RH) conditions can increase the amount of background shading. • Install a new toner cartridge.
<p>Toner smear</p> 	<ul style="list-style-type: none"> • Clean the inside of the printer. See “Cleaning the Inside” on page 6.4. • Check the paper type and quality. See “Paper Specifications” on page A.2. • Try installing a new toner cartridge.
<p>Repetitive vertical defects</p> 	<p>If marks repeatedly appear on the printed side of the page at even intervals:</p> <ul style="list-style-type: none"> • The toner cartridge may be damaged. If a repetitive mark occurs every 95 mm or 38 mm on the page, print the cleaning sheet several times to clean the cartridge (see page 6.5). If you still have the same problems, install a new toner cartridge. • Parts in the printer may have toner on them. If the defects occur on the back of the page, the problem will likely correct itself after a few more pages. • The fusing assembly may be damaged. Contact a service representative.

Problem	Solution
<p>Background scatter</p> 	<p>Background scatter results from bits of toner distributed on the printed page.</p> <ul style="list-style-type: none"> • The paper may be too damp. Try printing with a different batch of paper. Do not open packages of paper until necessary so that the paper does not absorb too much moisture from the air. • If background scatter occurs on an envelope, change your printing layout to avoid printing over areas that have overlapping seams on the reverse side. Printing on seams can cause this problem. • If background scatter covers the entire surface of a printed page, adjust the print resolution through your software application or the printer properties.
<p>Misformed characters</p> 	<ul style="list-style-type: none"> • If characters are improperly formed, producing hollow images, the paper stock may be too slick. Try a different paper. See "Paper Specifications" on page A.2. • If characters are improperly formed, producing a wavy effect, the scanner unit may need service. Check to see if it also occurs on a demo page by pressing the Demo button on the control panel when the printer is ready. If you need service, contact a service representative.
<p>Page skew</p> 	<ul style="list-style-type: none"> • Check the paper type and quality. See "Paper Specifications" on page A.2. • Make sure that the paper or other media is loaded correctly and the guides are not too tight or too loose against the paper stack.

Problem	Solution
<p>Curl or wave</p> 	<ul style="list-style-type: none"> • Check the paper type and quality. Both high temperature and humidity will cause paper curl. See “Paper Specifications” on page A.2. • Turn over the stack of paper in the paper tray. Also try rotating the paper 180° in the paper tray. • Open the rear output tray and try printing to the face up output tray.
<p>Wrinkles or creases</p> 	<ul style="list-style-type: none"> • Make sure that paper is loaded properly. • Check the paper type and quality. See “Paper Specifications” on page A.2. • Open the rear output tray and try printing to the face up output tray. • Turn over the stack of paper in the paper tray. Also try rotating the paper 180° in the tray.
<p>Back of printouts dirty</p> 	<ul style="list-style-type: none"> • The transfer roller may be dirty. See “Cleaning the Inside” on page 6.4. • Check if the toner is leaking. Clean inside the printer.
<p>Black pages</p> 	<ul style="list-style-type: none"> • The toner cartridge may not be installed properly. Remove the cartridge and reinsert it. • The toner cartridge may be defective and need replacing. Install a new toner cartridge. • The printer may require repairs. Contact a service representative.

Problem	Solution
<p>Loose toner</p> 	<ul style="list-style-type: none"> • Clean the inside of the printer. • Check the paper type and quality. See “Paper Specifications” on page A.2. • Try installing a new toner cartridge. • If the problem persists, the printer may require repairs. Contact a service representative.
<p>Character Voids</p> 	<p>Character voids are white areas within the parts of characters that should be solid black:</p> <ul style="list-style-type: none"> • If you are using transparencies when you experience this problem, try another type of transparency. (Because of the composition of transparency media, some character voids are normal.) • You may be printing on the wrong surface of the paper. Remove the paper and turn it around. • The paper may not meet paper specifications. See “Paper Specifications” on page A.2.
<p>Horizontal stripes</p> 	<p>If horizontally aligned black streaks or smears appear:</p> <ul style="list-style-type: none"> • The toner cartridge may be installed improperly. Remove the cartridge and reinsert it. • The toner cartridge may be defective. Install a new toner cartridge. • If the problem persists, the printer may require repairs. Contact a service representative.

Troubleshooting Error Messages

When the printer detects an error, the control panel indicator lights will indicate error messages. Find the light pattern below that matches the printer light pattern and follow the solutions to clear the error.

Printer Light Patterns

Light status legend

 symbol for "light off"

 symbol for "light on"

 symbol for "light blinking"

Error

Manual

Paper

Data

Power off

- Check the power cord and the power switch if your printer does not generate a response.
- Make sure that the printer is powered with the specified AC voltage.

Error

System error

- Reset the printer by briefly turning the printer off and back on again.
- If the error persists, contact the service representative.

Common Windows Problems

Problem	Possible Cause and Solution
"File in Use" message appears during installation.	Quit all software applications. Remove all software from the StartUp Group, then restart Windows. Reinstall the printer driver.
"Error Writing to LPTx" message appears.	<ul style="list-style-type: none">• Make sure that the cables are connected correctly, the printer is on, and the Data light on the control panel is on.• If bi-directional communication is not turned on in the driver, it will also cause this message.• From the Start menu, select Settings, then Printers. Right-click on the Samsung ML-6040 Series printer icon and select Properties. From the Details tab, click on Port Settings. Remove check from Check Port State before Printing box and click OK. From Spool Settings, select Print Directly to Printer and click OK. Try printing again.
"General Protection Fault", "Exception OE", "Spool32", or "Illegal Operation" messages appears.	<ul style="list-style-type: none">• Close all other applications, reboot Windows, and try printing again.• Delete all temp files from the Temp sub-directory. You can determine the name of the directory by editing the AUTOEXEC.BAT file and looking for the statement, "Set Temp =". The name after this statement is the temp directory. It is usually C:\temp by default, but can be redefined.

Note: Refer to Microsoft Windows 9x or NT 4.0 documentation that came with your PC for further information on Windows error messages.

Appendix

This appendix provides information on the following topics:

- ◆ Printer Specifications
- ◆ Paper Specifications
- ◆ Using Your Printer with a USB Cable
- ◆ Using Your Printer with a Macintosh
- ◆ Linux Driver Installation

Printer Specifications

Item	Specification and Description
Print Speed	12 PPM (A4), 12.6 PPM (Letter)
Resolution	True 600 x 600 dpi
First Printing Time	Less than 15 seconds
WarmUp Time	Less than 30 seconds
Power Rating	AC 100 ~ 120 V (USA, Canada) / 220 ~ 240 V (Others), 50 / 60 Hz
Power Consumption	350 W average during operation / Less than 12 W in power-save mode
Acoustic Noise	Stand by: Less than 35 dB; Operating: Less than 48 dB
Toner Supply	Single cartridge
Toner Cartridge Life	6,000 pages (for starter, 3,000 pages), 5% area coverage
Duty Cycle	Monthly: 12,000 pages maximum
Weight	11.2 Kg / 24.7 lb.
Package Weight	Paper: 1.7 Kg Plastic: 0.33 Kg
External Dimensions	361 (W) x 409 (D) x 247 (H) mm (without options)
Operating Environment	Temperature: 10 ~ 32 °C / 50 ~ 90 °F; Humidity: 20 ~ 80 % RH
Emulation	GDI
Fonts	1 bitmap, 45 scalable
Interface Switching	Automatic (Parallel, USB)
Interface	<ul style="list-style-type: none"> • 12PPM (A4) Bidirectional Parallel Standard <ul style="list-style-type: none"> - Modes supported: Compatible, Nibble, Byte, ECP • USB Interface Standard <ul style="list-style-type: none"> - USB 1.0 compliant - 12Mbps 1 port

Paper Specifications

Overview

This printer accepts a variety of media, such as cut-sheet paper (including up to 100 % recycled fiber content paper), envelopes, labels, transparencies and custom-size paper. Properties such as weight, composition, grain and moisture content are important factors affecting printer performance and output quality. Paper that does not meet the guidelines outlined in this manual can cause the following problems:

- Poor print quality
- Increased paper jams
- Premature wear on the printer, requiring repairs.

Notes:

- Some paper may meet all of the guidelines in this manual and still not produce satisfactory results. This might be the result of improper handling, unacceptable temperature and humidity levels, or other variables over which Samsung has no control.
- Before purchasing large quantities of paper, make sure that the paper meets the requirements specified in this user guide. Always test paper before buying large quantities.

CAUTION: Using paper that does not meet that stated specifications may cause problems for the printer, requiring repairs. Repairs made necessary by the use of paper not specified in this manual are not covered by the Samsung warranty or service agreements.

Supported Sizes of Paper

Auto Tray	Dimensions ^a	Weight	Capacity ^b
Letter	8.5 X 11 in. (216 X 279 mm)	16 to 28 lb Bond (60 to 105 g/m ²)	270 sheets of 20 lb Bond (75 g/m ²) paper
A4	210 X 297 mm (8.3 X 11.7 in.)		
Executive	7.3 X 10.5 in. (191 X 267 mm)		
Legal	8.5 X 14 in. (216 X 356 mm)		
B5 (JIS)	182 X 257 mm (7.2 X 10 in.)		
Folio	216 X 330 mm (8.5 X 13 in.)		
A5	146 X 210 mm		
A6	105 X 148 mm		

Manual Tray	Dimensions ^a	Weight	Capacity ^b
Minimum Size (custom)	98 X 148 mm (3.9 X 5.83 in.)	60 to 163 g/m ² Bond (16 to 43 lb)	1 sheets of paper
Maximum Size (custom)	216 X 356 mm (8.5 X 14 in.)		
Transparency	Same minimum and maximum paper sizes as listed above.	Thickness: .10 X .14 mm (0.0039 X 0.0055 in.)	
Labels ^c		Thickness: .10 X .14 mm (0.0039 X 0.0055 in.)	
Envelopes		up to 90 g/m ² (16-24 lb)	

a. The printer supports a wide range of media sizes. See "Printing on Card Stock or Custom-Sized Media" on page 4.15.

b. Capacity may vary depending on media weight and thickness, and environmental conditions.

c. Smoothness - 100 to 250 (Sheffield)

Note: You may experience some paper jams when using any media with a length of less than 148 mm (5.83 in.). For optimum performance, make sure you are storing and handling the paper correctly. Please refer to "Printer and Paper Storage Environment" on page A.6.

Guidelines for Using Paper

For best results, use conventional 90 g/m² (24 lb) paper. Make sure the paper is of good quality, and free of cuts, nicks, tears, spots, loose particles, dust, wrinkles, voids, and curled or bent edges.

If you are unsure of what type of paper you are loading (such as bond or recycled), check the label on the package of the paper.

The following problems with paper can cause print quality deviations, jamming, or even damage to the printer.

Symptom	Problem with Paper	Solution
Poor print quality or toner adhesion Problems with feeding	Too moist, too rough, too smooth, or embossed; faulty paper lot	Try another kind of paper, between 100 ~ 250 Sheffield, 4 ~ 5 % moisture content.
Dropout, jamming, curl	Stored improperly	Store paper flat in its moisture-proof wrapping.
Increased gray background shading /printer wear	Too heavy	Use lighter paper, open the rear output tray.
Excessive curl problems with feeding	Too moist, wrong grain direction or short-grain construction	<ul style="list-style-type: none"> • Open the rear output tray. • Use long-grain paper.
Jamming, damage to printer	Cutouts or perforations	Do not use paper with cutouts or perforations.
Problems with feeding	Ragged edges	Use good quality paper

Notes:

- Do not use letterhead paper that is printed with low-temperature inks, such as those used in some types of thermography.
- Do not use raised or embossed letterhead.
- The printer uses heat and pressure to fuse toner to the paper. Make sure that any colored paper or preprinted forms use inks that are compatible with this fusing temperature (200 °C or 392 °F for 0.1 second).

Paper Specifications

Category	Specifications
Acid Content	5.5 ~ 8.0 pH
Caliper	.094 ~ .18 mm (3.0 ~ 7.0 mils)
Curl in Ream	Flat within 5 mm (.02 in.)
Cut Edge Conditions	Cut with sharp blades with no visible fray.
Fusing Compatibility	Must not scorch, melt, offset, or release hazardous emissions when heated to 200 °C (392 °F) for .1 second.
Grain	Long Grain
Moisture Content	4 % ~ 6 % by weight
Smoothness	100 ~ 250 Sheffield

Paper Output Capacity

Output Tray	Capacity
Top output (Face-down) tray	250 sheets of 20 lb bond (75 g/m ²) paper
Rear output (Face-up) tray	100 sheets of 20 lb bond (75 g/m ²) paper

Printer and Paper Storage Environment

Ideally, the printer and paper storage environment should be at or near room temperature, and not too dry or humid. Remember that paper absorbs and loses moisture rapidly.

Heat works with humidity to damage paper. Heat causes the moisture in paper to evaporate, while cold causes it to condense on the sheets. Heating systems and air conditioners remove most of the humidity from a room. As paper is opened and used, it loses moisture, causing streaks and smudging. Humid weather or water coolers can cause the humidity to increase in a room. As paper is opened and used it absorbs any excess moisture, causing light print and dropouts. Also, as paper loses and gains moisture it can distort. This can cause paper jams.

As a result, paper storage and handling are as important as the paper-making process itself. Paper storage environmental conditions directly affect the feed operation.

Care should be taken not to purchase more paper than can be easily used in a short time (about 3 months). Paper stored for long periods may experience heat and moisture extremes, which can cause damage. Planning is important to prevent damage to a large supply of paper.

Unopened paper in sealed reams can remain stable for several months before use. Opened packages of paper have more potential for environment damage, especially if they are not wrapped with a moisture-proof barrier.

The paper storage environment should be properly maintained to ensure optimum printer performance. The required condition is 20 ° to 24 °C (68° to 75 °F), with a relative humidity of 45 % to 55 %. The following guidelines should be helpful when evaluating the paper's storage environment:

- Paper should be stored at or near room temperature.
- The air should not be too dry or too humid (due to the hygroscopic properties of paper).
- The best way to store an opened ream of paper is to rewrap it tightly in its moisture-proof wrapping. If the printer environment is subject to extremes, unwrap only the amount of paper to be used during the day's operation to prevent unwanted moisture changes.

Envelopes

Envelope construction is critical. Envelope fold lines can vary considerably, not only between manufacturers, but also within a box from the same manufacturer. Successful printing on envelopes depends upon the quality of the envelopes. When selecting envelopes, consider the following components:

- **Weight:** The weight of the envelope paper should not exceed 90 g/m² (24 lb) or jamming may occur.
- **Construction:** Prior to printing, envelopes should lie flat with less than 6 mm (0.25 in.) curl, and should not contain air.
- **Condition:** Envelopes should not be wrinkled, nicked, or otherwise damaged.
- **Temperature:** You should use envelopes that are compatible with the heat and pressure of the printer.
- **Size:** You should only use envelopes larger than 100 X 148 mm (3.97 X 5.83 in.).

Notes:

- Use only the Manual Tray to print envelopes.
- You may experience some paper jams when using any media with a length less than 148 mm (5.83 in.). This may be caused by paper that has been affected by environmental conditions. For optimum performance, make sure you are storing and handling the paper correctly. Please refer to "Printer and Paper Storage Environment" on page A.6.

Envelopes with Double Side Seams

Double side-seams construction has vertical seams at both ends of the envelope rather than diagonal seams. This style may be more likely to wrinkle. Be sure the seam extends all the way to the corner of the envelope as illustrated below.

Envelopes with Adhesive Strips or Flaps

Envelopes with a peel-off adhesive strip or with more than one flap that folds over to seal must use adhesives compatible with the heat and pressure in the printer. The extra flaps and strips might cause wrinkling, creasing, or even jams and may even damage the fuser.

Envelope Margins

The following gives typical address margins for a commercial #10 or DL envelope.

Type of Address	Minimum	Maximum
Return address	15 mm (0.6 in.)	15 mm (0.6 in.)
Delivery address	51 mm (2 in.)	89 mm (3.5 in.)

Notes:

- For best print quality, position margins no closer than 15 mm (0.6 in.) from the edges of the envelope.
- Avoid printing over the area where the envelope's seams meet.

Envelope Storage

Proper storage of envelopes helps contribute to print quality. Envelopes should be stored flat. If air is trapped in an envelope, creating an air bubble, then the envelope may wrinkle during printing. See "Printing on Envelopes" on page 4.9.

Labels

CAUTIONS:

- To avoid damaging the printer, use only labels recommended for laser printers.
- To prevent serious jams, always use the Manual Tray to print labels and always use the rear output tray.
- Never print on the same sheet of labels more than once and never print on a partial sheet of labels.

When selecting labels, consider the quality of each component:

- **Adhesives:** The adhesive material should be stable at 200 °C (392 °F), the printer's fusing temperature.
- **Arrangement:** Only use labels with no exposed backing between them. Labels can peel off sheets with spaces between the labels, causing serious jams.
- **Curl:** Prior to printing, labels must lie flat with no more than 16 mm (.61 in.) of curl in any direction.
- **Condition:** Do not use labels with wrinkles, bubbles, or other indications of separation.

See "Printing on Labels" on page 4.12.

Transparencies

Transparencies used in the printer must be able to withstand 200 °C (392 °F), the printer's fusing temperature.

CAUTION: To avoid damaging the printer, use only transparencies recommended for use in laser printers.

See "Printing on Transparencies" on page 4.13.

Using Your Printer with a USB Cable

If you have a USB (Universal Serial Bus) port enabled on your computer, and if your computer is running Windows 98, you can connect your ML-6040 series printer to the USB chain of devices.

Note: connecting the printer to the USB port of the computer requires a certified USB cable. You will need to buy the USB 1.0 compliant cable.

Installing the Printer Software

1. Connect printer with USB cable and install USB driver

- 1 Make sure that both the printer and computer are turned **ON**.
- 2 Insert the CD-ROM which came with your printer into the CD-ROM drive.
- 3 Plug one end of the USB cable into the USB port on the printer.

- 4 Plug the other end into the USB port on the computer.

- 5 The Add New Hardware Wizard dialog box appears. Click **Next**.

- 6 Check **Search for the best driver for your device** and click **Next**.

- 7 Check **CD-ROM drive** and click **Browse**, then choose **x:\USB** (where **x** is the drive letter for the CD-ROM drive).

- 8 Click **Next**. The USB driver will be installed.

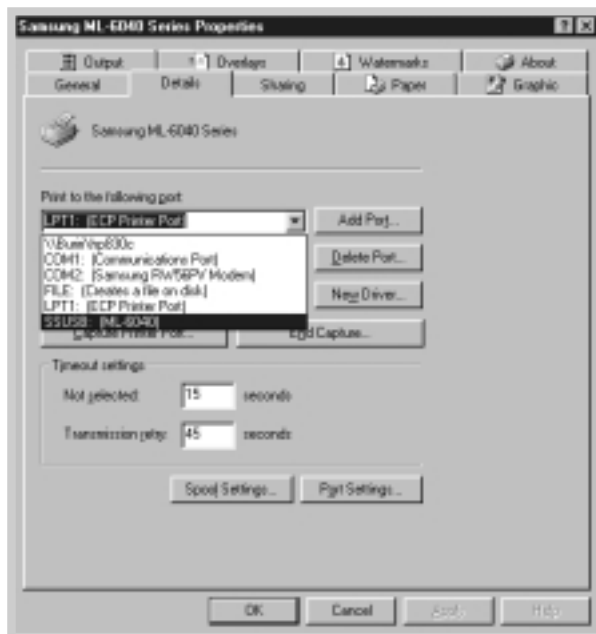

- 9 Follow the instructions on the screen to complete the installation.

- 2. Set your PC printer port** **1** From the **Start** menu, select **Settings**, then select **Printers**.

- 2** Select the **Samsung ML-6040 Series** printer icon in the **Printers** folder.
- 3** Select **Properties** from the **File** menu.
- 4** Click the **Details** tab. Select **SSUSB: (ML-6040)** in the **Print to the following port** box. Click **OK**. The setup is now completed.

Frequently Asked Questions About USB

Q What is USB?

A

Universal Serial Bus (USB) makes it easy to connect devices to your computer without having to open your PC. USB uses a standard port and plug combination for connecting devices like printers, modems, scanners, and digital cameras. It also offers the benefit of being able to easily add, remove, and move devices.

Because USB is a relatively new technology, we recommended using a parallel printing connection. However, USB is an option to customers who want to print from Windows 98, Macintosh using a USB cable. If your computer's USB port is enabled and properly setup, you can connect your printer to it or to a chain of USB devices via a USB cable.

Q How can I determine if my computer's USB port is enabled?

A

- 1 In Windows 98, select **Start** → **Settings** → **Control Panel**.
- 2 Double-click the **System** icon.
- 3 Click the **Device Manager** tab.
- 4 Click the plus (+) icon before the **Universal Serial Bus Controller** item.

If you see a USB host controller and a USB root hub listed, USB is properly enabled. If you have multiple hubs on the USB chain, try connecting your printer to a different hub or to another USB device. Also, make sure the cable connections are firm. (USB hubs are hardware devices into which you can plug multiple USB cables.)

If you do not see these devices listed, refer to your computer's documentation or contact the manufacturer for more information on enabling and setting up USB. Remember, you can always use a parallel cable to connect your printer's parallel port to your computer. (If you decide to switch to a parallel cable connection, you may need to remove and reinstall the printer software.)

Q Can other users on my USB chain print to my ML-6040 printer?

A Yes. Windows 98 allows you to “share” your printer using software settings on your computer. After others on the USB chain have installed the printer software for your specific printer, they can print to your shared printer.

Q After I install my printer, why isn't my ML-6040 printer assigned to an LPT printer port in the Print dialog box of my software application?

A USB uses a different naming convention for USB devices. After the printer has been installed, you see **SSUSB:(your printer name)** instead of **LPT**.

Q How can I increase printing speed and quality?

A When operated on a USB chain, your printer may become slower if other USB devices are being used while you're printing. For optimal print performance, avoid using other devices in the USB chain while printing.

Using Your Printer with Macintosh

Your printer supports Macintosh systems with a built-in USB interface. When you print a file from Macintosh, you can use the PCL driver to support your printer's major printing features.

System Requirements

To use your ML-6040 printer and its software with a Macintosh, your system should have:

Macintosh Hardware Requirement:

- One of the following Macintosh models:
 - Power Macintosh series (for network connection only)
 - Power Macintosh G3, G4
 - iMac series
 - iBook series, PowerBook series
- USB interface

Macintosh System Requirement:

System 8.6 or later

Installing Software for Macintosh

Connecting to Macintosh

You can connect the printer to your Macintosh using the USB interface.

USB cable is not provided in your printer. Purchase a certified USB 1.0 compliant cable.

- 1 Turn off the printer and computer.

- 2 Hold the USB cable so the  icon faces up and connect it to your printer's USB connector.

- 3 Connect the other end of the cable to an available USB port on your Macintosh computer. If you have any connecting problems, please refer to your computer documentation.

Note: If you are using a USB hub, connect the printer's cable to the first tier of the hub or the printer may malfunction. If the printer doesn't work with the hub, connect it directly to the USB port.

Installing Software

- 1 Turn on your computer and printer.
- 2 Insert the CD-ROM which came with your printer into the CD-ROM drive.
- 3 Double-click **Samsung ML-6040** on your Macintosh desktop.
- 4 Select the correct language, then click **Continue**.
- 5 Click **Install**.
- 6 After installation is complete, click **Quit**.

Choosing PCL Driver

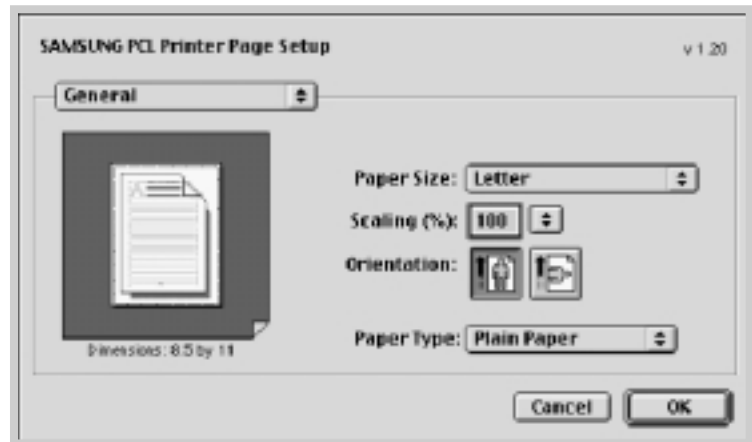

- 1 From the **Apple** menu, select **Chooser**.
- 2 From the left pane of the Chooser window, click **SAMSUNG PCL**. Then the Samsung PCL driver name will appear in the right pane of the Chooser window.
- 3 Click the Samsung PCL driver, and close the Chooser window.
- 4 You see the message box indicating that you have changed your current printer. Click **OK**.
- 5 A Samsung PCL printer icon will be created on your desktop.

Printing from a Macintosh

When you print with a Macintosh, you need to check the printer software setting in each application you use. Follow these steps to print from a Macintosh:

- 1 Open a Macintosh application and select a file you want to print.
- 2 Open the **File** menu, and click **Page Setup (Document Setup** in some applications). You will see the Page Setup dialog box.

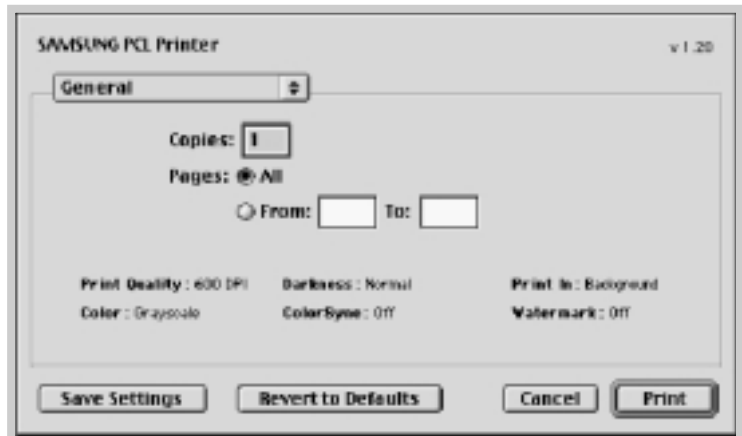

- 3 Choose your paper size, orientation, paper type and other options and click **OK**.

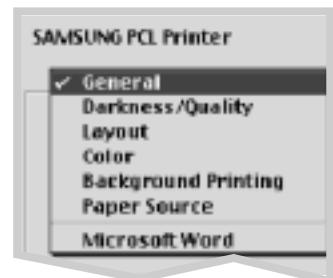

Choose **Watermark** if you want to add a watermark to each page in your document to emphasize its purpose or indicate how it should be handled. For details on the watermark option, see page 5.21.

- 4 Now open the **File** menu and click **Print**. You see the main printer settings dialog box.
- 5 Choose the number of copies and indicate which pages you want to print. For advanced printing features, select the desired option. For details, see page A.21.

Select the desired option for advanced printing features.

- 6 Click **Print** when you are finished checking your settings.

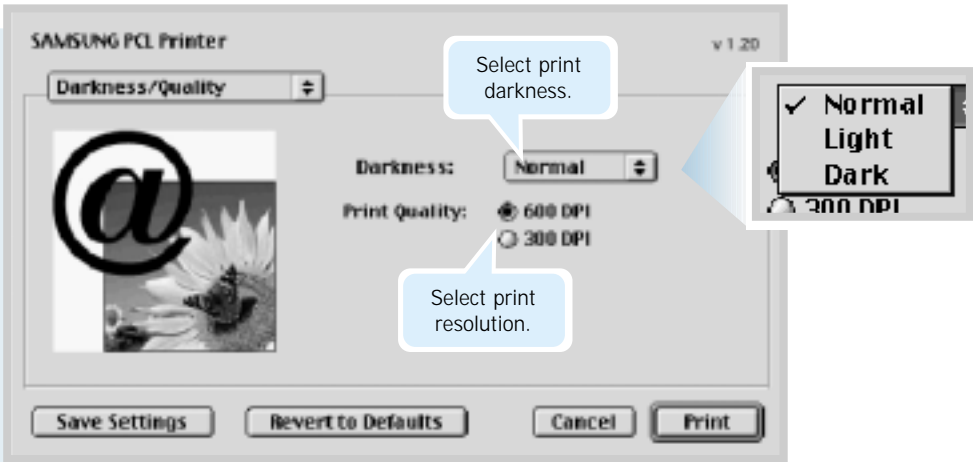

Advanced Printing

The Page Setup dialog box contains five categories of page setup properties. Listed below is the name of each property.

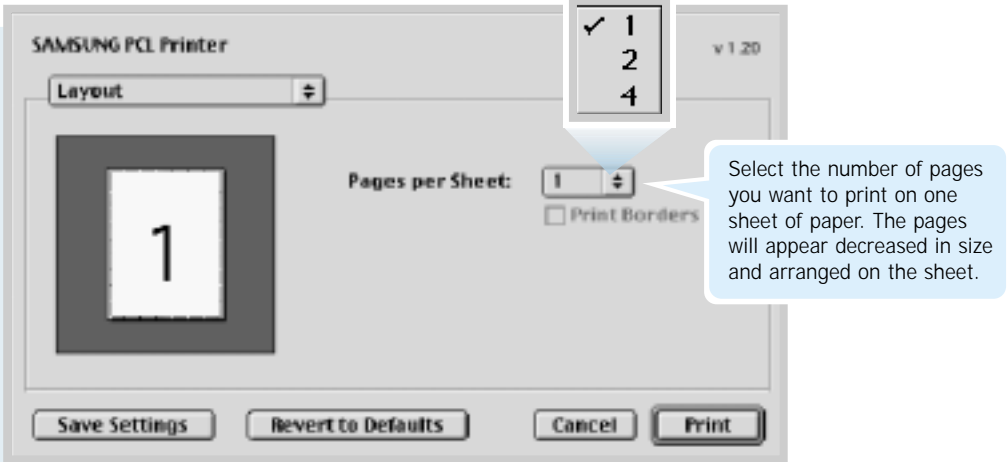

- Darkness/Quality
- Layout
- Color
- Background Printing
- Paper Source

Figures below display each property in the Page Setup dialog box.

Linux Driver Installation

This Linux driver is designed for the Samsung ML-6040 Series printer and supports Linux Red Hat 6.0 or higher and Intel Linux. If your Linux version is not included, this driver might not work properly.

- Install Setup Script file configuration
 - a. /cdrom/linux/install/install.sh
 - b. /cdrom/linux/install/ssprt.db
 - c. /cdrom/linux/install/readme.txt

Installation

To install the driver, open the x terminal screen and take the following steps:

1. Mount the CD-ROM drive.

Note: To mount the CD-ROM drive, you must be a super user or must be authorized to mount the CD-ROM by the super user. If you fail to mount the CD-ROM drive, ask the system administrator.

To mount the CD-ROM drive:

- 1 Insert the Samsung ML-6040 CD-ROM into the CD-ROM drive.
- 2 Mount the CD-ROM drive under a directory like `/mnt` in order to access the files on the CD-ROM:
`>mount -t iso9660 /dev/cdrom /mnt/cdrom`

2. Install setup script.

For details on installing the setup script, refer to the `/cdrom/linux/readme.txt` file.

Add the driver to the printer list by typing in:
`/cdrom/linux>install.sh` (or)
`/cdrom/linux>install.sh` (if the path of the current working directory is not determined.)

3. Set up the printer filter.

To set up:

- 1 Run **printtool** at x terminal.
- 2 To add the printer driver, click the **Add** button.
- 3 In the Add a Printer Entry window, decide the printer type you will use. Select **Local Printer** if you have a PC-connected printer.
- 4 Click the **OK** button.
- 5 If the **Info** button appears, ignore it, then click the **OK** button.
- 6 The Edit xxxx Entry window opens (where xxxx is the printer type you have selected at step 3).

If you are not an advanced user, do not change the **Names/Spool Directory/File Limit in Kb/Printer Device** option.

- 7 Click the **Select** button in the **Input Filter** to access filter setup.
- 8 Select **Samsung Printer PCL 5e Compatible** for the Printer Type item. Then select the default resolution and paper size.
- 9 To save the setting, press the **OK** button.
- 10 In the Edit xxxx Entry window, press the **OK** button to complete the printer driver installation.
- 11 You can find that the printer driver is added to the driver window. Select **Quit** from the **PrintTool** menu.
